A MESSAGE FROM THE CEO

Welcome to CSI!

When you enroll at Computer Systems Institute, you are embarking on an intellectual and practical journey that will challenge, encourage and facilitate your growth and development as a career professional. The institute takes great pride in the resources it provides to those seeking career development in business, healthcare and information technology fields. When you complete your chosen area of study and convert the academic and practical applications to further your education or seek employment opportunity, you will be joining thousands of CSI graduates who have enjoyed comparable outcomes during the past 25 years.

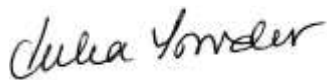

CSI was founded on three enduring principals that drive and shape the education of students:

- Develop career professionals who embrace opportunities for economic and personal development.
- Design and initiate practical programs of study that are comprehensive, rigorous and affordable.
- Support academic achievement through a robust array of student services that ensure academic and career success.

The team of academic, administrative and support professionals at CSI are dedicated to the achievements and personal growth of every student, and to the priorities of completion, employment or further academic study. Our commitment is to ensure every student develops intellectual and practical skills, and has the opportunity to refine those skills through real-world experiences in the classroom and beyond.

Access to economic opportunity begins with access to education and professional development. CSI is proud to serve in that capacity across an array of disciplines, serving students from diverse and international backgrounds. Access to professional and personal development knows no borders.

Welcome to CSI!

Sincerely,
Julia Lowder
CEO

GENERAL INFORMATION

HISTORY

Founded in 1989, CSI has prepared tens of thousands of students from a wide variety of backgrounds, providing them with access to an integrated, real-world education that emphasizes academic as well as skill development and personal achievement. The institute employs a unique, robust mix of academic preparation, hands-on learning activities, contemporary e-learning technologies and encounters with real-world employment externships.

With headquarters in Skokie, IL, Computer Systems Institute serves students through three locations in Illinois: Chicago, Skokie and Lombard. It serves students through three locations in Massachusetts: Charlestown, Boston (Allston), and Worcester.

CSI MISSION

We are a dynamic institution providing career focused high quality programs designed to enhance job opportunities for our graduates and provide a skilled workforce for the community. We strive to achieve this by employing qualified and enthusiastic professionals who create a stimulating learning environment and deliver effective career development services.

SUPPORTING OBJECTIVES

CSI strives to appreciate the unique needs and learning styles of every student, their capacities, qualities and characteristics. In that way, the student's education and professional development needs can be fulfilled by the dedicated community of academic, administrative and support professionals. The emphasis on personalized instruction creates a stimulating learning environment that is augmented by e-learning platforms and technology in instructional endeavors; robust encounters with theory, models and best practices; and culminating immersion in hands-on, real world projects. The focus is on students who graduate as confident, well prepared individuals who are prepared to meet their personal and professional goals.

To achieve its mission, CSI holds itself accountable for meeting the following objectives:

- Achieve compliant levels of student achievement through routine, recurring measurement of student learning outcomes
- Retain a student-centered, professional staff to provide superior instruction in the academic programs
- Develop and maintain effective, sustainable relationships with employers and professionals to create more employment opportunities for students and graduates
- Instill the ethic of continuing education and professional development among students to achieve and sustain career advancement.

CSI CREDENTIALS

- CSI is approved by the Division of Private Business and Vocational Schools of the Illinois Board of Higher Education
- Skill Building, CS and Career programs at the Worcester, Allston, and Charlestown campuses are licensed to operate by the Massachusetts Division of Professional Licensure of Private Occupational School Education
- CSI is authorized under Federal Law to enroll non-immigrant alien students

OUR PHILOSOPHY

CSI's philosophy is based on the premise that our students come to school to change their lives. CSI has created affordable career training and language learning opportunities that are high quality, rich in services and support, and expertly designed to meet our students' goals.

ORGANIZATION AND GOVERNANCE

LEGAL STATUS

Computer Systems Institute is a private institution of higher education incorporated under the laws of the State of Illinois. The governing board includes Ella Zibitsker, Chairman of the Board; Julia Lowder, CEO; Dr. Boris Zibitsker, Board Member. The officers have the legal authority and responsibility for the institution's operation and control.

STATE APPROVAL

Computer Systems Institute Illinois Campuses are approved by the Division of Private Business and Vocational Schools of the Illinois Board of Higher Education.

The Worcester, Boston (Allston), and Charlestown campuses are licensed to operate by the Massachusetts Division of Professional Licensure of Private Occupational School Education.

STATEMENT REGARDING ACCREDITATION

Computer Systems Institute is committed to provide an excellent educational experience, with qualified and talented faculty and supportive staff members. CSI is not accredited by a U.S. Department of Education-recognized accrediting body and that means that federal loans and grants cannot be utilized in conjunction with CSI's programs.

STATEMENT OF NON-DISCRIMINATION

Computer Systems Institute is committed to ensuring that all individuals have equal opportunity to programs and facilities. No person shall be discriminated against because of race, color, sex, sexual orientation, gender identity, religion, disability, age, genetic information, veteran status, ancestry or national or ethnic origin in the administration of its educational policies, admission policies, employment policies, scholarship and loan programs, and other Institute-administered programs and activities.

ADMISSION REQUIREMENTS FOR ENGLISH AS A SECOND LANGUAGE PROGRAMS*

- Must be over compulsory school age to enroll.
- Students are required to have a High School diploma or its equivalent (GED or HiSet®). To prove eligibility student is required to complete a Self-Attestation of HS Graduation or Equivalency
- Before enrolling in English as a Second Language program, students must take the Accuplacer® ESL Test, which is a standardized, computer-based placement test that evaluates students' skills in grammar usage, listening, and reading. Based on the student's score, the student will be placed into an appropriate program level. ESL Programs are designed for students whose knowledge of English language allows them to score within a range of 20 to 115 on Accuplacer® ESL Test.

* *Form I-20 will not be issued for ESL Programs*

ENGLISH AS A SECOND LANGUAGE PROGRAM	ACCUPLACER® ESL TEST SCORE	PRIOR TO 11/21/2016 COMPASS ESL TEST SCORE
Beginner ESL Program	20 – 60.99	0 – 50.99
Intermediate ESL Program	61 – 80.99	51 – 76.99
Advanced ESL Program	81 – 100.99	77 – 90.99
General Writing Program	81 – 115.99	77 – 94.99
Communication Program	81 – 115.99	77 – 94.99
Literature Program	81 – 115.99	77 – 94.99

Students who test within the 4.5 point range of the minimum required scores in each program may request additional speaking and writing testing with the Academic Dean or designee. Based on the average scores of the additional testing, students can be placed in one program level higher or lower than their original placement.

Placement Test is not required under the following conditions:

ENGLISH AS A SECOND LANGUAGE PROGRAMS	ESL PLACEMENT TEST SCORE REQUIREMENT EXCEPTIONS
Intermediate ESL Program	Successful completion of the CSI Beginner ESL program
Advanced ESL Program	Successful completion of the CSI Intermediate ESL program
General Writing Program	Successful completion of one of the following CSI programs: Advanced ESL, Communication, Literature, BCP, NCP, HCP, PHLTEC, CSE, CSFND, CSEX, CSS, HIP, AAP, SBA, or SMP.
Communication Program	Successful completion of one of the following CSI programs: Advanced ESL, General Writing, Literature, BCP, NCP, HCP, PHLTEC, CSE, CSFND, CSEX, CSS, HIP, AAP, SBA, or SMP.
Literature Program	Successful completion of one of the following CSI programs: Advanced ESL, Communication, General Writing, BCP, NCP, HCP, PHLTEC, CSE, CSFND, CSEX, CSS, HIP, AAP, SBA, or SMP.

ENGLISH PROFICIENCY REQUIREMENTS FOR NON-NATIVE SPEAKERS OF ENGLISH FOR SKILL BUILDING, BUSINESS CAREER, HEALTHCARE, NETWORKING CAREER AND CS PROGRAMS

Computer Systems Institute is committed to offering its education programs to students from a broad range of cultures and languages. In doing so, it recognizes its responsibility to ensure that students, whose first language is not English, have sufficient proficiency to undertake the program of their choice.

Applicants from countries where English is not the primary spoken language and applicants whose native language is not English must demonstrate English-language proficiency by providing the school with one of the following:

- An Accuplacer® ESL test score of **81** or higher. Students who test within the 4.5 point range of the minimum required score may request additional speaking and writing testing with the Academic Dean. Based on the average scores of the additional testing, students can receive an additional 4.5 points added to their original placement.
- Successful completion of at least one of the following CSI programs: Intermediate ESL, Advanced ESL, General Writing, Literature, Communication, BCP, NCP, HCP, PHLTEC, CSE, CSEX, CSFND, CSS, HIP, AAP, SBA, or SMP.
- A Test of English as a Foreign Language (TOEFL) test score of **500** or higher (paper-based test), **173** or higher (computer based) or a **61** or higher (internet-based). Submitted scores must be less than two years old.
- An International English Language Testing System (IELTS) score of **6** or higher. Submitted scores must be less than two years old.
- Valid copy of degree completion at a college program in the United States.
- A High School diploma or GED certificate issued in the United States.
- A NACES or AICE evaluated high School or college diploma from a country which uses English as the language for education, such as: Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, Botswana, Canada, Ethiopia, Falkland Islands, Gambia, Ghana, Great Britain, Grenada, Guyana, India, Ireland, Jamaica, Kenya, Liberia, Micronesia, New Zealand, Nigeria, Sierra Leone, St. Kitts, St. Lucia, Solomon Islands, The Philippines, Trinidad, Uganda, United States, Zambia, and Zimbabwe.

Effective March 29, 2017, prior to this date IELTS score was 4.5 and higher. Effective November 21, 2016, prior to this date the minimum score requirement was 77 or higher on the COMPASS Placement test. Prior to May 1, 2016 the minimum score requirement was 51 or higher on the COMPASS Placement test.

ENGLISH PROFICIENCY REQUIREMENTS FOR NON-NATIVE SPEAKERS OF ENGLISH FOR THE BUSINESS CAREER PROGRAM, BUSINESS CAREER PROGRAM – DIGITAL MULTIMEDIA CONCENTRATION

Computer Systems Institute is committed to offering its education programs to students from a broad range of cultures and languages. In doing so, it recognizes its responsibility to ensure that students, whose first language is not English, have sufficient proficiency to undertake the career program of their choice.

Applicants from countries where English is not the primary spoken language and applicants whose native language is not English must demonstrate English-language proficiency by providing the school with one of the following:

- An Accuplacer® ESL test score of **51** or higher for Business Career program and 60 or higher for Business Career program – Digital Multimedia concentration. Students who test within the 4.5 point range of the minimum required score may request additional speaking and writing testing with the Academic Dean or designee. Based on the average scores of the additional testing, students can receive an additional 4.5 points added to their original placement.

- Successful completion of one or more of the following CSI programs: Beginner ESL, Intermediate ESL, Advanced ESL, General Writing, Literature, Communication, BCP, NCP, HCP, PHLTEC, CSE, CSEX, CSFND, CSS, HIP, AAP, SBA, or SMP.
- A Test of English as a Foreign Language (TOEFL) test score of **433** or higher (paper-based test), **120** or higher (computer based) or a **40** or higher (internet-based). Submitted scores must be less than two years old.
- An International English Language Testing System (IELTS) score of **4.5** or higher. Submitted scores must be less than two years old.
- Valid copy of degree completion at a college program in the United States.
- A High School diploma or GED certificate issued in the United States.
- A NACES or AICE evaluated High School or college diploma from a country which uses English as the language for education, such as: Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, Botswana, Canada, Ethiopia, Falkland Islands, Gambia, Ghana, Great Britain, Grenada, Guyana, India, Ireland, Jamaica, Kenya, Liberia, Micronesia, New Zealand, Nigeria, Sierra Leone, St. Kitts, St. Lucia, Solomon Islands, The Philippines, Trinidad and Tobago, Uganda, Zambia, and Zimbabwe.

POLICIES AND CRITERIA FOR ACCEPTING TRANSFER CREDIT FOR ACADEMIC PROGRAMS

CSI will evaluate and consider awarding academic credit for credits earned at higher education institutions if the course is appropriate for inclusion in a CSI program. Requests for transfer credits should be submitted to the Registrar's Office as a part of the admissions process prior to the first day of scheduled classes. In order to have transfer credits accepted at Computer Systems Institute, a student must have an official transcript from his or her previous school sent to the Registrar's Office.

To be considered "official," a transcript must be in a sealed envelope and signed by the granting institution. No photocopies will be accepted. All transcripts that are not from an American institution must be evaluated. Any student wishing to transfer credit must have a course-by-course evaluation completed. Transcripts in a language other than English must also include an official English translation. All evaluations must be completed by an approved NACES agency or by AACRAO Evaluation Services. Any costs incurred due to this service will be the responsibility of the student and must be paid directly to the agency performing the service.

In order to be accepted for transfer credit, courses must be similar in scope and credit to an appropriate CSI course. In order for the course to be considered for transfer, the students must have earned at least a grade of "C" and completed the respective course within the past three years. Computer Systems Institute limits the number of transfer credits accepted from other institutions at 49% for a chosen program of study.

Transfer credit is designated with a grade of TR on the student transcript and is not calculated in a student's GPA or CGPA. Transfer credits are calculated as attempted and earned in the determination of the student's pace of completion.

CSI will not award transfer credit for the following types of courses:

- Remedial or retraining courses
- Personal development, human potential courses
- Professional development, in-service education, continuing education courses, or other similar courses designed for individuals who want to upgrade their occupational or professional skills, acquire new skills, or prepare for a proficiency examination
- Courses in professional disciplines not supported by Computer Systems Institute

Computer Systems Institute reserves the right to limit the transferability of a course based on the source of credit, the method of instruction, or the duration of the term. Transcripts submitted to CSI for admission or credit transfer become the property of the school and cannot be returned to the student or forwarded to other institutions. Final determination on the transferability of coursework for credit is made by CSI Registrar's Office.

Restarting a CSI Program

If a student has taken one or more courses in any given program within the last 5 years and received a grade of C or higher, but has not completed the program, they are allowed to complete the program if the outstanding course(s) are being offered in subsequent quarter(s). Upon successful completion, the student will receive a Certificate of Completion. In instances where the outstanding course(s) are not being offered in subsequent quarter(s) or the time period is greater than 5 years, students desiring to complete the program will need to take all courses (including those passed previously) in the program and receive a grade of C or higher in order to complete the program and receive a Certificate of Completion.

Repeating of previously passed courses is limited to 50% of program length. For example, in a program containing 4 courses, a student can repeat up to 2 courses to complete the program and receive a Certificate of Completion.

Military Coursework

CSI may award transfer credit for some of the military courses if the content is equivalent to a course taught at CSI. Students should be prepared to submit an official military transcript (e.g. SMART, AARTS, etc.) to the Registrar's Office for evaluation before the first day of scheduled classes.

TRANSFERABILITY OF CREDIT AND ARTICULATION AGREEMENTS

Outside of existing articulation agreements, Computer Systems Institute does not guarantee that the credits obtained at CSI are transferable to another institution. Credits or coursework are not likely to transfer. Any decision on the comparability, appropriateness and applicability of credit, as well as whether credit should be accepted is the decision of the receiving institution. An articulation agreement is an agreement between institutions to accommodate the transfer of credits between institutions. Please use the following link for a list of articulation agreements CSI has with other educational institutions:

<http://www.csinow.edu/articulation-agreements/>

START REQUIREMENTS

To be considered an official start, students must meet the following start requirements:

1. All admissions paperwork must be completed
2. Tuition and fees must be paid in full
3. All students must attend class by the published start deadline*

*Please see calendar for specific dates

FINANCIAL SERVICES

TUITION AND FEES

Tuition, book and fee rates at Computer Systems Institute are subject to occasional review and revision based on factors that may include increases in program expenses and changing market rates for similar programs.

Although tuition, book and supply fees may increase from time to time, CSI guarantees that students who are continuously enrolled in the same program will not be subject to changes in tuition and fees during their period of enrollment. A student is considered to be continuously enrolled in the same program as long as he or she has not been withdrawn from that program of study.

Student tuition at Computer Systems Institute covers access to the following benefits and services:

- Instructor-led education and training
- Open labs
- Student Affairs

CSI program tuition and fees table can be found at csinow.edu/tuition-fees
A \$100 late fee will be charged to any payments received after the deadline.

SUPPLIES AND OTHER EXPENSES

The costs of courseware and/or textbooks are not included in the tuition fee. Programs have a separate book and supply fee, which covers the cost of books, license fees, and certain activity fees for that quarter. Supply fees are non-refundable for any student who starts a course, additionally books issued to students are non-refundable. Book adjustments will be made on those books not picked up. F-1 international students are subject to additional fee for I-20 processing, transfer in SEVIS record, and document mailing fees. These fees are non-refundable.

PAYMENT POLICY

There are no payment plans available for any program or courses. Students must make the tuition and fee payment in full by the published deadline date in the student calendar. A \$100 late fee will be charged to any payments received after the deadline.

FINANCIAL OBLIGATION

Students must satisfy all financial obligations to CSI. Students who issue personal checks that are returned by banks or fail to make a good faith effort to keep up with their financial obligation to the school may be subject to dismissal. Certificates of Completion, and official transcripts will be withheld from the student until all financial obligations are satisfied.

DELINQUENT ACCOUNTS

If students have a delinquent account balance, they will be notified by the Business Office. Upon receipt of this notification, their payment must be made immediately. Students will first have the opportunity to make payment directly to CSI. If they do not respond to CSI's attempts to collect their balance, their account will be referred to an outside collection agency. Should this occur, credit bureaus may be notified and the student will be responsible for the outstanding balance plus all collection costs and legal fees.

Students will also have a hold tag placed on their account, which will prevent future registration, receipt of an official transcript and/or Certificates of Completion. All grades, transcripts, and Certificates of Completion will be withheld until the student has satisfied their balance in full or satisfactory payment arrangements for all funds have been made.

Computer Systems Institute (CSI) reserves the right to change any of the above policies when, in the judgment of the administration, it becomes necessary to do so.

A \$100 late fee will be charged to any payments received after the deadline.

SCHOOL WITHDRAWAL PROCESS

In addition to academic consequences, withdrawing from CSI may effect a student's F-1 status. Students are encouraged to seek advice from a DSO and Student Affairs before deciding to withdraw. Detailed information about the cancellation of enrollment and withdrawal from CSI is available below.

If a student decides to withdraw, he/she must follow the established withdrawal procedures for CSI. Students intending to withdraw are asked to notify the Student Affairs Department by telephone, in

person, or in writing to provide official notification. During the withdrawal process, students are asked to provide the official date of withdrawal and the reason for withdrawing in writing.

Once the process of withdrawal begins, the student or a staff member of the Student Affairs Department will complete all necessary form(s). Students that are absent for 21 consecutive calendar days will be withdrawn from school.

REFUND/CANCELATION/WITHDRAWAL POLICY

Withdrawing from the school may have both academic and financial consequences. You are encouraged to understand the consequences before you decide to withdraw, meeting with Student Affairs is highly recommended. Detailed information about the cancellation of enrollment and withdrawal from the school is available below. During the withdrawal process, students are asked to provide the official date of withdrawal and the reason for withdrawing in writing. Students that fail to meet their program attendance requirements will be withdrawn from school.

Tuition credit calculations listed below are based on a percentage of tuition and may not reflect actual amount to be refunded. Actual amount refunded will be based on payments made to the institution. Specific dates indicated above are based on continuous enrollment from Class Start Date with all courses completed successfully, and are subject to change in the event of failed courses, leaves of absence or other unexpected breaks in attendance.

If a course is canceled or discontinued, the student will be refunded in full. CSI will refund all fees to a student who cancels under the following circumstances:

- The school did not provide the prospective student with a copy of the student's valid enrollment agreement and the current catalog or bulletin; or
- The school cancels or discontinues the course of instruction in which the student is enrolled.

REFUND DISTRIBUTION

All refunds will be made within 30 calendar days from the date of receipt of a student's cancellation.

STUDENT RESPONSIBILITIES

It is to a student's benefit to immediately notify the Student Affairs Department when he or she stops attending classes with the intent to withdraw.

INSTITUTIONAL PRO RATA REFUND CALCULATION AND POLICY

When a student withdraws, Computer Systems Institute (CSI) must determine how much of the tuition and fees it is eligible to retain. The Pro Rata Refund Calculation and Policy is an institutional policy.

INSTITUTIONAL COSTS

Institutional costs include charges for tuition and mandatory fees. Institutional costs do not include optional expenses that may be charged to a student account, such as supplies from the bookstore, or other similar charges.

REFUND POLICY

If you withdraw from a CSI program, you may be eligible for a tuition adjustment that may generate a tuition refund in accordance with the following tables below. Supply fees are non-refundable for any student who starts a course, additionally books issued to students are non-refundable. Book adjustments will be made on those books not picked up.

ILLINOIS REFUND POLICY

You may terminate this agreement at any time. Tuition adjustments/refunds are based on the full tuition cost of the program, not on what has been paid in the program. The students last date of attendance will be used to calculate the % of the tuition adjustment/refund therefore students may be responsible for tuition not yet paid if they drop within the % of the program as shown in the refund policy below. Tuition credit calculations listed below are based on a percentage of tuition and may not reflect actual amount to be refunded. Actual amount refunded will be based on payments made to the institution. Specific dates indicated above are based on continuous enrollment from Class Start Date with all courses completed successfully, and are subject to change in the event of failed courses, leaves of absence or other unexpected breaks in attendance. If you cancel your classes or withdraw from the school, you may be eligible for a tuition and fee refund based on the following refund table:

<i>Refund Condition, Amount and Dates</i>
If you terminate this agreement within five days you will receive a refund of all monies paid, provided that you have not commenced the program*
If you subsequently terminate this agreement prior to the commencement of the program, you will receive a refund of all monies paid*
If you terminate this agreement prior to completing more than 5% of the program, you will receive a refund of at least 100% percent of the tuition*
If you terminate this agreement prior to completing more than 25% of the program, you will receive a refund of at least 75% percent of the tuition*
If you terminate this agreement prior to completing more than 50% of the program, you will receive a refund of at least 50% percent of the tuition*
If you terminate this agreement prior to completing more than 75% of the program, you will receive a refund of at least 25% percent of the tuition*
The school is not obligated to provide any refund if you terminate this agreement during the fourth quarter of the program

*Additional costs school may retain, I-20 processing fee, transfer fee, mailing fees, supply fee and book costs. You have the right to cancel this enrollment contract before the completion of 5 school days or 5% percent of this Program, whichever occurs first, and to receive a full refund of all monies paid, less non-reusable supplies or equipment.

REFUND POLICY FOR BOOKS AND SUPPLY

Supply fees are non-refundable for any student who starts a course, additionally books issued to students are non-refundable. Book adjustments will be made on those books not picked up.

REFUND AND DISTRIBUTION POLICY

All refunds will be made within 30 calendar days from the date of receipt of a student's cancellation. Computer Systems Institute adheres to the refund policy published in the Academic Catalog, which adheres to the guidelines prescribed by the State of Illinois and other states as noted in the enrollment agreement or addenda and by the federal government.

Students have the right to cancel their enrollment contract before the completion of 5 school days or 5% percent of the Program, whichever occurs first, and to receive a full refund of all monies paid, less non-reusable supplies or equipment.

STUDENT AFFAIRS

The Student Affairs Department is committed to facilitating a student-centric environment. CSI provides a variety of resources that enhance student success and support students with their academic achievement, educational goals, personal growth, and professional growth.

PERSONAL STUDENT ADVISING

When facing a difficult personal issue, students are encouraged to contact the Student Affairs Department on their campus. The staff can offer information and referrals to professional counseling and human service agencies in the area in which students reside so that students can gain the help they need.

JOB PLACEMENT SERVICES

The Student Affairs department at CSI assists graduates with job searching skills, resume and interview preparation, and information on current job market needs.

ANTI-HARASSMENT POLICY, INCLUDING SEXUAL HARASSMENT

All students have a right to study in an environment free of verbal or physical harassment that is based on race, religion, color, ancestry, age, sex, national origin, citizenship, pregnancy, marital status, sexual orientation or sexual preference, unfavorable military discharge, military status, arrest record, disability, or any other legally protected characteristic. In keeping with this commitment, CSI will not tolerate harassment of any student by anyone, including any employee, manager, co-worker, vendor, or student based on any of these legally protected characteristics. Activities of this nature are unlawful and serve no legitimate purpose; they have a disruptive effect on the ability to perform academically, and they undermine the integrity of the Institute. Any discriminatory or harassing conduct or interference with the investigation of an alleged incident of discrimination or harassment will result in disciplinary action, up to and including expulsion. Sexual harassment is not permitted at CSI. Sexual harassment includes but is not limited to the following wrongful conduct:

1. Unwelcome sexual advances, gestures, and requests for sexual acts or favors or other verbal or physical conduct of a sexual nature
2. Any statement or implication that an individual's submission to or rejection of such sexual conduct could be used as a condition of employment/enrollment or as the basis for any employment/enrollment decision affecting such individual
3. Any conduct, whether physical or verbal, which has the purpose or the effect of substantially interfering with an individual's academic performance or creating an intimidating, hostile, or offensive learning environment. This includes, but is not limited to: slurs, jokes, or degrading comments of a sexual nature; offensive sexual flirtation, sexual advances, gestures, or propositions; abuse of a sexual nature; graphic verbal comments about an individual's body; sexual innuendo or suggestive comments; sexually oriented "kidding" or "teasing"; unwanted physical touching, including patting or pinching another's body; the display of sexually suggestive printed or visual materials, clothing, objects, or pictures; and sexually suggestive, provocative, or lewd exposure or touching of one's self while at the Institute.

Every student must avoid any conduct that reasonably could be interpreted as discrimination or harassment under this policy, even if such conduct was not intended to be offensive. Conversely, students are expected and encouraged to inform campus authorities whenever conduct is unwelcome, offensive, or in poor taste. Only through such open communication CSI can maintain the type of academic environment where everyone has an equal opportunity to flourish.

STUDENTS WITH DISABILITIES

Computer Systems Institute recognizes and supports the role that Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and similar state laws have in achieving academic success. Computer Systems Institute is committed to making reasonable accommodations for students with qualified disabilities and to ensuring that its campuses and its facilities are made accessible as required by applicable law. The Institute cannot make accommodations that alter the nature of its programs, cause undue burdens on CSI, or create a direct threat to the health and the safety of students or others.

Requests for Accommodations

A reasonable accommodation in the student setting is a modification or adjustment to a class or program that will enable a qualified person with a disability to participate in the program or class or to enjoy the rights and privileges offered by the Institute. Modifications that impose an undue burden or pose a health or safety risk are not considered reasonable. The school is required to make modifications only to known and validated disabilities. CSI requires the student to give reasonable notice of the request for modifications. The school or department must take whatever steps are necessary to ensure that qualified individuals with disabilities are not excluded, treated differently or segregated because of the absence of auxiliary aids or services. The school or department must coordinate the provision of modifications with the Student Affairs Department.

Medical records supporting the need for an accommodation are submitted to the Student Affairs Department along with an Accommodations Application. This arrangement is consistent with the confidentiality requirements of the law and with Computer Systems Institute Policy.

Application Submission Procedures: All applications should be submitted prior to the start of the program or within 7 days of receipt of the application. The application can be requested through the Admissions, Student Affairs or Academics Department and should be submitted to Student Affairs with supporting documentation.

The accommodation request form can be found at:

<http://www.csinow.edu/images/pdf/Accommodation%20Form.pdf>

Individual Analysis: The modification offered must be appropriate to the needs of the individual, thus, in each instance, an individualized analysis must occur. The Student Affairs Department along with Academics can devise a modification plan for the student.

Most Integrated Setting: Programs and activities must be offered in the most integrated setting appropriate. In other words, there should not be a separate program for those with disabilities unless the disabled student cannot be accommodated in any other way. If a separate program is offered, the disabled student may still choose to utilize the non-separate program.

Events: The law requires that organizations that receive significant assistance from CSI are also governed by the provisions of the Americans with Disability Act (ADA) and Section 504. Events that are a part of CSI are covered by the provisions of the law and should be scheduled at accessible locations if possible.

Course Load Modifications: CSI is not required to eliminate academic requirements essential to the program of instruction or related to licensing requirements; however, reasonable modifications must be provided for qualified students with verified disabilities.

Examinations: Exam modifications may include the following:

- Changes in the length of time permitted for completion of an exam; or

- Adaptation of the manner in which the exam is given (for example, allowing a student to take the exam in a distraction-free testing room)

Auxiliary Aids and Services: This term refers to equipment or service providers that augment communication. Examples are sign language interpreters, note takers, readers, computer aided transcription devices, assistive listening devices, telecommunications devices for deaf persons (TDD's), and Braille materials. The school pays for the reasonable cost of the auxiliary aid or service. If provision of a particular auxiliary aid or service would result in a fundamental alteration of the program or in an undue burden, i.e., significant difficulty or expense, CSI will attempt to provide an alternative auxiliary aid or service. The school does not need to provide attendants, individually prescribed devices, readers for personal use or study, or other devices or services of a personal nature. The school will give careful consideration to the requests of the affected disabled individuals, but is not required to give the disabled person the auxiliary aid of his or her choice. If a question arises about what should be provided, contact the Student Affairs Department on the campus.

Fundamental Program Alteration: Computer Systems Institute is not required to provide any aid or service or make any modification that would result in a fundamental alteration in the nature of the program. For example, where a course requirement is essential to the program of instruction taken by the student, the school is not required to waive the requirement. In evaluating whether the requested program modifications would require substantial program alteration or would fundamentally alter academic standards or programs, the Academic Dean or designee will consider the underlying academic reasons for the program components, the academic standards institutionalized in the program, how the challenged components are consistent with the program standards, and whether the requested accommodations would be inconsistent with the academic goals and standards of the program.

Direct Threat to Health or Safety: The school is not required to permit an individual to participate in or benefit from a CSI program or service when that individual poses a direct threat to health or safety. Direct threat means a significant risk to health or safety that cannot be eliminated by modification of policies, practices, or procedures, or by the provision of auxiliary aids or services. In determining whether an individual poses a direct threat to health or safety, CSI must make an individualized assessment, based on reasonable judgment relying on current medical knowledge or the best available objective evidence to ascertain:

- The nature, duration, and severity of the risk
- The probability that the potential injury will actually occur
- Whether reasonable modification of policies, practices or procedures will mitigate the risk

This standard should be applied to all individuals, not just disabled individuals.

Undue Burden: The school needs not make modifications or provide auxiliary aids or services if it constitutes an undue burden. In determining whether or not an undue burden exists, the factors considered are the nature and cost of the action needed in the context of the overall financial resources of the school.

Final Determination: CSI will notify the student of all final accommodations prior to the start of class.

VOTER REGISTRATION

The Higher Education Act Amendments of 1998 require colleges to make a good faith effort to make voter registration forms available to students. Voter registration forms are available online at

Illinois: <http://www.elections.il.gov/Downloads/VotingInformation/PDF/R-19.pdf>

FERPA

The Family Educational Rights and Privacy Act of 1974, commonly known as FERPA, is a federal law that protects the privacy of students' education records. FERPA affords eligible students certain rights with respect to their education records. An "eligible student" under FERPA is a student who is 18 years of age or older or who attends a postsecondary institution at any age, therefore Computer Systems Institute considers an "eligible student" any student who is currently attending Computer Systems Institute or has been in attendance. FERPA does not apply to applicants who have been admitted but who have not been in attendance.

Student Rights under FERPA:

Eligible student(s) (further referred to as "Student(s)") have specific, protected rights regarding the release of their education records. These rights include:

1. The right to inspect and review the student's education records within 45 days of the day that Computer Systems Institute receives a written request for access.

To gain access, the student must submit a written request to the Registrar's Office, identifying the specific record(s) the student wishes to inspect. This request will be granted within 45 days. The student may ask for an explanation and/or copy of his/her "Education Record." Examination will be permitted under conditions that will prevent alteration or mutilation of the record. The Registrar's Office or designee will make arrangements for access and notify the student of the time and place where the requested records may be inspected. The student must present proper identification upon request. Documents submitted by or for the student in support of his/her application for admission or for transfer credit will not be returned to the student or sent elsewhere. Right of Access does not include financial records of parents or any information therein, "records" to which access has been waived by a student, and records not included in the FERPA definition of education records.

2. The right to request the amendment of the contents of an education record that the student believes is inaccurate, misleading, or otherwise in violation the student's privacy rights under FERPA. FERPA does not address issues involving assigned grades for academic work.

If the student believes his/her education record's content to be inaccurate, he/she may submit a written request to the record custodian for amendment of the record. The student should clearly identify the part of the record the student wants changed, and specify why it should be changed. Normally such matters will be satisfactorily settled in the course of informal discussion with the student within 45 days of the request. When this is not the case, Computer Systems Institute will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information (PII) contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

Computer Systems Institute discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is typically a person employed by Computer Systems Institute in an administrative, supervisory, academic or research, or support staff position (including students employed with Computer Systems Institute as a part of Federal Work Study Program); a person or company (vendor) with whom Computer Systems Institute has contracted as its agent to provide a service instead of using Computer Systems Institute's employees or officials (attorney, auditor, collection agency, IT service provider, etc.); a person serving on the Board of Directors; an organization conducting studies for Computer Systems Institute for the purpose of assisting in accomplishing the Computer Systems Institute's mission; a volunteer serving Computer

Systems Institute in a position requiring access to student records who performs an institutional service or function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records (including but not limited to a student serving on an official committee or assisting another school official in performing his or her tasks).

A school official has a legitimate educational interest if the official needs access to an education record in order to fulfill his or her professional responsibilities.

Upon request, Computer Systems Institute may disclose education records without consent in the following cases:

1. To officials of another school in which a student seeks or intends to enroll or is already enrolled, if the disclosure is for purposes related to the student's enrollment or transfer;
2. To appropriate persons in connection with an emergency if knowledge is necessary to protect the health or safety of a student or other persons;
3. To accrediting organizations to carry out their accrediting functions;
4. To federal, state or local education authorities as defined in FERPA regulations ("Federal and State Authorities") in connection with program evaluation, research, or data compilation of state or federally supported education programs. (See Possible Federal and State Data Collection and Use);
5. To organizations conducting studies for, or on behalf of, the school; and
6. In compliance with judicial order or lawfully issued subpoena, after Computer Systems Institute has made a reasonable effort to notify the student if the notification is not prohibited by the subpoena;
7. If a state law adopted before FERPA (November 19, 1974) requires disclosure and superseded FERPA.

Possible Federal and State Data Collection and Use

As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which the student's education records and personally identifiable information (PII) contained in such records — including student's Social Security Number, grades, or other private information — may be accessed without student's consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to education records and PII without student's consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution. Second, Federal and State Authorities may allow access to education records and PII without student's consent to researchers performing certain types of studies, in certain cases even when the institution objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the entities that they authorize to receive student's PII, but the Authorities need not maintain direct control over such entities. In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student's consent PII from education records, and they may track student's participation in education and other programs by linking such PII to other personal information about a student that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

United States Citizenship and Immigration Services (USCIS) requires international students attending an educational institution under an F-1 visa to sign the Form I-20. The Form I-20 contains a consent provision allowing for the disclosure of information to USCIS. The consent provision states that "I authorize the

named school to release any information from my records which is needed by USCICS pursuant to 8 C.F.R.214.3(g) to determine my nonimmigrant status

4. The right to file with the Department of Education a complaint concerning alleged failures by Computer Systems Institute to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

The Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202

Directory Information

Directory information is defined by the Family Educational Rights and Privacy Act of 1974 (FERPA) as information contained in a student's education record "that would not generally be considered harmful or an invasion of privacy" if disclosed. Each institution has the right to define, within the limits of FERPA regulations, the data that it considers to be directory information.

Computer Systems Institute has designated the following information as directory information:

- Student Name
- Student Address
- Telephone Number
- Email Address
- Student ID number (in capacity of electronic identifier or displayed on a student ID card)
- Current Enrollment Status (number of enrolled credit hours, full-time or part-time status)
- Program of Study
- Student Photograph
- Honors, Awards, Certifications and Distinctions Received
- Dates of Attendance*

*Computer Systems Institute follows FERPA regulations' definition of dates of attendance as the period of time during which a student attends or attended an institution. Examples of "dates of attendance" include an academic year or a spring quarter. The definition does not include specific daily records of a student's attendance at an educational agency or institution

Directory information may be disclosed from a student's education record without prior consent per FERPA regulations. Therefore, Computer Systems Institute may disclose appropriately designated "directory information" without student's written consent, unless the student requests in writing that it be kept confidential. Computer Systems Institute does not release lists of students or name-and-address labels to businesses or agencies that do not fall in the scope of definition of "school official with legitimate educational interests" listed above.

FERPA Block

Students who do not want their directory information to be released without their prior written consent must notify the Registrar's Office in writing within 30 days of the program start date listed on their Enrollment Agreement or within 30 days of receiving annual FERPA notification statement. Computer Systems Institute refers to this action as "FERPA Block."

For any student whose directory data is placed on "FERPA Block," Computer Systems Institute will:

1. state, "We can provide no information on that person" to any request for information;
2. refuse to release any information about the student to any non-institutional person or organization, including but not limited to family and relatives, current or future employers, insurance companies, media outlets, honor societies etc.;
3. omit student's name from Honor Roll listings and commencement program;
4. provide no personal information over the phone.

FERPA Block request should be carefully considered since it could have undesired results. Computer Systems Institute will honor the student's request to withhold directory information but cannot assume responsibility to contact the student for subsequent permission to release this information. Regardless of the effect upon the student, Computer Systems Institute assumes no liability as a result of honoring the student's written instructions that directory information be withheld.

FERPA Block status remains in effect until the student notifies the Registrar's Office in writing to remove it.

Deceased Students

FERPA's protection of personally identifiable information in a student's education records ends at the time of a student's death and is a matter of institutional policy. As a courtesy to the families of recently deceased students who were enrolled at the time of death, Computer Systems Institute generally will not release information from educational records of deceased students, unless required to do so by law or authorized to do so by the deceased student's spouse, parents, children, or executor of the deceased's estate.

NEW STUDENT ORIENTATION

New Student Orientation welcomes all new students to Computer Systems Institute. Orientation enables students to familiarize themselves with the campus and its services. See the student academic calendar for orientation dates. All new students are required to attend the orientation program. Orientation is a very important part of a student's experience. The orientation is designed to help students learn and understand important school policies along with the federal, state, or immigration regulations and procedures. It also provides new students with advice and assistance in adjusting to the local community as well as an opportunity to meet staff and current students, register for classes and learn about available student affairs.

PERSONAL PROPERTY

CSI assumes no liability or responsibility for loss of personal property or personal injury sustained on campus or at CSI-related, off-campus functions.

LOST AND FOUND

Lost articles may be claimed upon proper identification through the campus front desk or Student Affairs Department. Students are advised not to leave purses or other valuables unattended at any time. CSI will not assume responsibility for any lost or stolen articles.

STUDENT ID

The replacement fee for a lost and stolen ID is \$5.

CSI ASSIGNED EMAIL ACCOUNT AS PRIMARY MEANS OF COMMUNICATION

Computer Systems Institute provides students with an email account upon the student's official start at CSI. This account is free of charge and remains active for up to a year after student's exit from the school. The CSI assigned student email account is CSI's official and primary means of communication among students, faculty, staff and administration at Computer Systems Institute.

Students are responsible for all information sent to them via their CSI assigned email account. If a student chooses to forward their student email account, he or she is responsible for all information, including attachments, sent to any other email account.

ELECTRONIC DEVICES

No student will be called out of class for a telephone call, except in an emergency. Students should inform family and friends of this rule. Use of cellular telephones, pagers, text-messaging devices, and personal-use iPods, etc. is not permitted in class or labs. These devices should be turned off prior to entering into a classroom or a lab.

SMOKING/EATING

Students are welcome to pause, relax, and eat or smoke in designated areas before or after classes. However, absolutely no smoking is allowed inside the building. Smoking is allowed outside in the designated smoking areas. Eating or drinking is not permitted in classrooms or labs.

GUESTS/CHILDREN

Guests must register with the front-desk receptionist. Non-students are not permitted beyond the reception area unless accompanied by a CSI staff member. Children are not permitted on campus property unaccompanied and/or unsupervised nor are permitted in any classrooms, laboratories, or student lounges. Children are not permitted to handle or touch any campus equipment at any time while on campus property.

HOUSING AND TRANSPORTATION

CSI does not provide housing or transportation to its campuses.

VACCINATIONS AND IMMUNIZATIONS

CSI does not require proof of vaccinations and immunizations.

ACADEMIC ASSISTANCE

Students who find they are falling behind or need academic assistance should contact their Instructor or the Academic Dean or designee to obtain appropriate academic guidance or tutoring through a referral to the Institute's Department of Academics. Department of Academics provides opportunities for academic development, assists students with basic course requirements, and serves to motivate students toward successful completion of their postsecondary education. The goal of academic assistance through the Department of Academics is to increase retention and graduation rates and facilitate the learning process. The Academic Dean or designee oversees tutors and other campus operations.

The services of the Department of Academics can include:

- Help in basic study skills
- Tutorial services
- Mentoring
- Special services for students with limited English proficiency
- Workshops

VIOLENCE AT SCHOOL

Computer Systems Institute strongly believes that all students should be treated with dignity and respect and will take appropriate action necessary to help ensure that CSI campuses are and remain violence free. This policy is intended to ensure the highest standard of health and safety for all Computer Systems Institute students. Under no circumstances are the following items permitted on CSI property (including parking lots), vendor properties, or at any CSI-sponsored event location:

- Any type of firearm or ammunition
- Dangerous chemicals
- Explosives
- Blasting caps or any ingredient of an explosive or incendiary nature
- Other weapons or any objects that could be used for injury or intimidation

Threatening, intimidating, coercing, harming, or interfering with the performance of employees, applicants, students, vendors, managers, or the general public is strictly prohibited. Based on reasonable supporting facts or witnesses, appropriate disciplinary action will be taken, up to and including expulsion, against anyone who violates this policy.

DRUG AND ALCOHOL POLICY

Consistent with its mission as an institution of higher education, Computer Systems Institute (CSI) is committed to educating students, faculty, and staff on the dangers of alcohol and drug abuse, and to maintaining an environment in which such behavior is prohibited.

Annual Distribution to Students and Employees

Although the policy is included in the school website <http://www.csinow.edu/about-csi/consumer-information>, (which is available to all new student applicants and potential employees); the Campus President or the Executive Vice President shall ensure that an email notification (Consumer Information Disclosure) is provided annually to all students and employees. The Disclosure will include the exact URL of the on-line Drug and Alcohol policy.

Standards of Conduct

While on campus or at any School-sponsored event; faculty, staff, and students may not possess, use, deliver, sell, or distribute any illegally controlled substance. Further, faculty, staff, and students may not possess or consume alcoholic beverages on school property or at school-sponsored events (except as noted below), nor be present on school property or at school-sponsored events while visibly under the influence of alcohol or illegal substances.

Penalties/Disciplinary Actions

Persons who violate this policy will be subject to disciplinary action by the school, with penalties up to and including the termination of enrollment/employment (dismissal). Individuals will also be subject to penalties and sanctions imposed by local, state, and federal laws. Students should be aware that substance abuse carries legal consequences, which may include imprisonment, fines, and/or loss of property. The drug abuse statutes for Illinois can be found at the following links:

[Illinois Controlled Substances Laws](#)

[Illinois Laws Regarding Possession of Alcohol by Person Under 21 Years of Age](#)

Dangers of Addiction and Substance Abuse

All students should be aware that substance abuse causes serious health risks, including altered moods, altered behavior, sleep disorders, distorted senses, and permanent damage to the liver, heart, and central nervous system. More information about addiction, the drugs and substances of “substance abuse,” and the health risks of substance abuse can found at the following links:

[National Institutes of Health - Facts about Addiction](#)

[National Institutes of Health - The Drugs of Addiction](#)

[Illinois Department of Human Services Alcoholism and Addiction Services Page](#)

Rehabilitation

CSI will encourage and assist employees with chemical dependencies to seek self-help or professional treatment, and will provide students with information about local agencies and community resources to assist persons with dependency problems. There are local government and charitable agencies and

resources available to assist individuals with dependency issues: Some of these resources can be found at the following link: <http://www.treatmentcentersofillinois.com/>.

Enforcement

All student disciplinary enforcement under this policy shall be based on the severity of the offense and the actions of the student with regard to the incident. CSI management shall be the sole judge of the sufficiency of evidence in such matters.

Disciplinary and administrative decisions regarding this policy shall be made in a manner consistent with applicable law. CSI reserves the right to make referrals to law enforcement authorities, and may permit law enforcement officials to conduct searches of CSI's facilities at any time.

STANDARDS OF CONDUCT

Students at CSI assume the obligation of conducting themselves in a manner appropriate to an educational institution. Misconduct that will expose students to disciplinary action includes, but is not limited to, the following behaviors:

1. Dishonesty, cheating, falsification
2. Obstruction or disruption of CSI activities
3. Theft or damage to Institute property
4. Being under the influence of alcohol or illegal drugs
5. Possession, distribution, sale, transfer, or use of alcohol or illegal drugs
6. Fighting or threatening violence
7. Boisterous or disruptive activity
8. Negligence or improper conduct leading to damage of Computer Systems Institute-owned or customer-owned property
9. Insubordination or other disrespectful conduct
10. Violation of safety or health rules
11. Smoking on campus
12. Sexual or other unlawful or unwelcome harassment
13. Using Computer Systems Institute equipment for purposes other than education
14. Downloading ANYTHING onto Computer Systems Institute's computers
15. Violation of policies

CORRECTIVE ACTION

Computer Systems Institute holds each of its students to the standards of conduct (See Standards of Conduct). When a student deviates from these rules and standards, CSI will begin to take corrective action against all parties involved. Corrective action at CSI is progressive. That is, the action taken in response to a rule infraction or violation of standards typically follows a pattern increasing in seriousness until the infraction or violation is corrected. The usual sequence of corrective actions includes an oral warning, a written warning, probation, and finally termination of training. In deciding which initial corrective action would be appropriate, CSI management will consider the seriousness of the infraction, the circumstances surrounding the matter, and the student's previous record.

Though committed to a progressive approach to corrective action, Computer Systems Institute considers certain rule infractions and violations of standards as grounds for immediate discharge from the school. These include but are not limited to theft in any form; insubordinate behavior; vandalism or destruction of school property; being on school property during non-business hours; the use of school equipment without prior authorization by CSI Management; and misrepresentations of CSI to a customer, a prospective customer, the general public, or an employee.

DISMISSAL POLICY

CSI reserves the right to dismiss any student whose attendance, conduct, and/or academic or financial standing does not meet the school's standards as set forth in this catalog and the Student Handbook. Students who have been dismissed from the Institute due to conduct may appeal this decision by submitting a letter in writing to the Director of Academics or his or her designee within seven calendar days of the dismissal. Within seven days of receipt of the appeal letter, the Program Manager, the Academic Dean, the Director of Academics, the Manager of Student Affairs and Externships conduct a follow-up meeting.

RE-ENTRY POLICY

Students who have withdrawn from the Institute may apply for re-entry within 180 days from their last date of attendance. Re-entry candidates are required to meet with a Re-entry Specialist or designee and complete re-entry paperwork. Students who re-enter the Institute are required to sign a new enrollment agreement and will be subject to the tuition, book fees and any new program requirements in effect at the time of re-entry.

Students not eligible for re-entry:

- Students who have been dropped due to reaching the maximum time frame cannot re-enter CSI within 180 days
- Students who were dropped due to violating the code of conduct must follow the Appeal Process as outlined in the Student Handbook

RESTART POLICY

Any student withdrawn from the Institute for more than 180 days from his or her last day of attendance (LDA) must re-apply for admission through the Admissions Department. All restarts are required to follow the application procedures outlined in the Admissions Information Section of the school catalog.

STUDENT COMPLAINTS

Students with a complaint of a nonacademic nature relating to their experience at the school should first attempt to resolve the matter directly with the person or the office responsible for the problem. If a student has an academic issue or a concern (e.g., make-up work, instruction, etc.), he/she should contact the instructor. If this does not result in a satisfactory resolution, the next step is to talk with the Academic Dean or designee. If a student still cannot find a satisfactory resolution, he/she can take the next step and initiate a formal complaint process by submitting a written and a signed complaint to Campus Leadership. A formal complaint could also include an email received directly from a student's email account. Additionally, a Feedback comment, received through the Student Portal, that includes a student's full name is also considered a written and signed formal complaint.

Complaints against the school may be registered with:

- The Illinois Board of Higher Education
Illinois Board of Higher Education
Division of Private Business and Vocational Schools
1 North Old State Capitol Plaza
Suite 333
Springfield, Illinois 62701-1394
Phone: (217) 782-2551
Fax: (217) 782-8548
<http://complaints.ibhe.org/>

INTERNATIONAL STUDENT POLICIES

MAINTAINING STUDENT STATUS

To remain in F-1 status, a student is required to:

1. Be a full-time student (Students must be enrolled for 12 credit hours per quarter).
2. Maintain Satisfactory Academic Progress (SAP).
3. Obtain proper employment authorization before beginning any work (if applicable).
4. Report changes in address, legal name or program within 10 calendar days of the change to the Designated School Official (DSO).
5. Obtain the DSO approval before traveling outside of the U.S.
6. Report any intention to transfer to another school, leave the country or change status to the DSO.
7. Obtain an updated I-20 when a funding source changes.
8. Obtain permission from the DSO before requesting a leave of absence or withdrawal from CSI.
9. Keep a valid passport and Form I-94 at all times. Expiring passports can be renewed in the United States through the embassy of the student's home country.
10. File timely request for practical training and other changes or additions.

Students who fail to maintain their F-1 student status are considered to be “out of status” and are not eligible for any student visa benefits such as on- and off-campus employment; practical training; change of level; or registration for future courses. Out-of-status students must apply to USCIS to reinstate their F-1 status. Eligibility for student visa benefits can be regained if USCIS approves the reinstatement. For questions regarding their status reinstatement, students should see the DSO immediately.

SOCIAL SECURITY NUMBER REGULATIONS

Federal regulations prohibit international students with an F-1 visas from receiving a valid social security number for employment purposes unless the student receives on-campus or off-campus employment, curricular practical training (CPT), or optional practical training (OPT). To apply for a social security number, students must see an International Admissions Representative, Student Affairs Coordinator or DSO who will explain the process based on the student's employment options. (See F-1 Student Employment Opportunities Section below).

The following documentation will be needed to be provided to the Social Security Office:

- A completed Form SS-5
- An I-20 Form with page 2 completed and signed by DSO
- An I-94 Form
- A valid passport
- Evidence of employment (letter from the employer with employment start and end dates)
- Confirmation letter from the DSO verifying the employment offered

Students who receive a Social Security Number must provide the number to the Registrar's Office.

DRIVER'S LICENSE

To apply for or renew a driver's license, students should see Students Affairs on their campus.

F-1 STUDENT EMPLOYMENT OPPORTUNITIES

General Information

“Employment” is defined as the rendering of services on either a part-time or full-time basis for compensation, financial or otherwise. It is important to remember that the employment of F-1 international students is restricted and controlled by U.S. Citizenship and Immigration Services (USCIS)

regulations. Failure to comply with USCIS regulations will result in termination of F-1 student status.

Employment Eligibility Verification Form (I-9 Form)

F-1 international students who are authorized for employment must have their employer complete the Employment Eligibility Verification Form (I-9 Form). The employer will retain the form. The I-9 Form must be updated each time a student receives a renewal of work permission. In general, F-1 students who have been in the U.S. less than five years may be exempt from Social Security (FICA) taxes. Student earnings are subject to applicable federal, state, and local taxes. Students must file a tax return on or before April 15th each year, which will determine if any of the withheld taxes can be refunded.

On-Campus Employment

F-1 international students, who are enrolled full-time, may be eligible to work legally on campus. According to USCIS regulations, international students may work on campus up to 20 hours per week while school is in session and up to 40 hours per week during schedule vacation breaks if on-campus positions are available. On-campus employment is not permitted after graduation.

Students who participate in on-campus employment are eligible to apply for a Social Security Number. The Student Affairs Department can help with the SSN application process. If approved, the DSO will provide the student with a certification letter to present to the Social Security Administration office.

Off-Campus Employment Based on Economic Necessity

F-1 international students may not work off-campus unless they receive permission from the U.S. Citizenship and Immigration Services (USCIS). To qualify for work permission due to economic necessity, students must have been in the U.S. on an F-1 visa for at least one academic year, be enrolled full-time, and be in good academic standing. In addition, students must prove to USCIS that their financial circumstances have changed unexpectedly and that they no longer have sufficient funds to remain in school. They must also prove that work will not interfere with their studies. When circumstances warrant, USCIS will grant that permission based on severe and unforeseen economic hardship.

Practical Training

International students cannot engage in internships/externships, including volunteer positions, without approval from the U.S. Citizenship and Immigration Services (USCIS) and CSI. There are two types of Practical Training: Curricular Practical Training and Optional Practical Training.

Curricular Practical Training

F-1 students may engage in curricular practical training under certain conditions and only after receiving DSO approval. To qualify for CPT the student must:

- Continually maintain the F-1 student status in the U.S. and be active in SEVIS while applying. Students waiting for reinstatement, applicants wishing to transfer to CSI with a terminated or a completed status, or those with a newly approved status change are not eligible for CPT
- Be lawfully enrolled on a full-time basis for one academic year in the U.S. prior to CPT authorization
- Be enrolled in one of the following programs where externship is an integral part of the established academic curriculum: Customer Service Specialist, Hospitality Industry Professional, Administrative Assistant Professional, Sales and Marketing Professional, Small Business Administrator, CS Foundation, CS Essential or CS Expert
- Must earn 12 credits in their first quarter in the program

ESL students are not eligible for CPT.

CPT Application and Authorization Procedures

Students who meet all eligibility requirements for CPT must submit the following paperwork:

- Externship Site Agreement signed by the student, externship supervisor and Academic Dean or designee
- A signed externship offer letter printed on the employer's letterhead. The letter must include the title and responsibilities of the position, name of the supervisor and address of the externship site, number of externship hours per week, and start and end date of the externship assignment.

If CPT request is approved, the student will receive a new I-20 Form with CPT authorization. Students may engage in CPT employment only after they have received the I-20 Form with CPT authorization from the DSO. Work authorization is valid only for the specific externship site, the time period, and part-time or full-time basis as approved and recorded by the DSO as evidenced on the I-20 Form. Students can neither begin working until the CPT has been approved, nor continue employment beyond the date listed on their I-20 Form.

Maintaining CPT authorization

To maintain their CPT authorization students must:

- Maintain full time enrollment at all times while participating in CPT. CPT authorization will be voided if a student falls below the full time status or is withdrawn from the program. Students authorized to take a leave of absence will not be eligible for CPT during the time of the leave.
- Maintain Satisfactory Academic Progress (SAP) by attending classes and completing coursework including externship class.
- Complete all externship requirements as prescribed by their program of study.
- Engage in externship only at the approved externship site, during the time period, and on a part-time or full-time basis as authorized by the DSO on the I-20 Form
- Immediately report any termination of externship to Student Affairs Coordinator and DSO.

Loss of Externship

All students who lose their externship site during their academic term must self-report to Student Affairs. Failure to report may result in administrative withdrawal from the program and may affect student status. If the loss of employment occurs during the academic term, students are responsible for the remaining hours needed in externship to receive academic credit. Students are also responsible for ensuring a new externship is found and verified in a timely manner according to externship process. Failure to complete the required hours in the academic term may cause the student to fail the course and/or implicate their SAP progress. For SBA, SMP and AAP students, failing the Externship Course will result in the loss of externship eligibility in the subsequent quarter of the same program.

Optional Practical Training

Optional Practical Training (OPT) is a 12-month fulltime work authorization approved by USCIS to work in the field of study upon completion of all program requirements. OPT employment must be listed on student I-20. Initial employment may begin only after an Employment Authorization Document (EAD card) has been received from USCIS.

Eligibility for OPT:

- F-1 students who completed 1 academic year of full-time study
- F-1 students who completed all coursework requirements
- Hold valid F-1 status
- Good academic standing
- Employment must be in the student's major field of study

The I-765 and I-20 with recommended OPT must be received by USCIS no sooner than 90 days before student's expected date of completion, and no later than 60 days after the program end date. In addition, the Form I-765 and I-20 in support of OPT must be received by USCIS no later than 30 days after the DSO updates SEVIS with the OPT recommendation. OPT authorization process can take up to 4 month to obtain. For OPT Application process the following documents have to be submitted to USCIS:

- I-765 Form
- 2 passport-style photos
- Copy of student I-94 (both front and back)
- Copy of unexpired passport page
- Copy of F-1 visa
- Copy of previously issued EAD cards
- Recommendation for OPT from DSO in SEVIS
- New I-20 with employment information (not required at the time of application) issued by DSO
- Previously issued I-20 with CPT

Approval process:

- DSO determines student's eligibility to apply for OPT
- DSO recommends OPT in SEVIS.
- Student files I-765 application with USCIS for EAD card.
- Work can begin only after receiving EAD issued by USCIS, and on or after the start date on the EAD.

Students have to make an appointment with DSO to be instructed on how to apply to USCIS for the EAD card.

Students on OPT are limited to an aggregate maximum of 90 days of unemployment.

TRAVEL

Students who plan to travel outside of U.S. including trips to Canada or Mexico must first meet with and receive approval from the Academic Dean or designee prior to getting DSO approval for international travel. Students will need to have appropriate documentation before leaving the country, otherwise they may be denied re-entry into the U.S. To receive DSO approval, the student must submit the following documents to the Student Affairs Department at least two weeks before the intended departure date:

- Current I-20
- Copy of their Passport (must be valid at least six months from the departure date)
- I-94 card
- Proof of travel

TRANSFERRING OUT

Students planning to transfer to another school in the U.S. should first consult with DSO on their transfer eligibility. To complete the transfer the student must provide the following documents to the Student Affairs advisor on their campus:

- A transfer form and acceptance letter
- Accepting institution's address and contact information
- Student must update their contact information before transferring out

In order to be transferred "in status" students must be in good academic standing with CSI. Students are advised to verify with the new school's DSO on their transfer eligibility and start requirements to maintain their F-1 status.

Transfer out requests take 5 – 10 business days to process.

ACADEMIC POLICIES

ATTENDANCE POLICY AND METHODS OF DOCUMENTING ATTENDANCE

Attending classes daily is critical to a student's academic success. Computer Systems Institute expects students to attend classes regularly. Poor attendance or excessive absences will negatively affect a student's grade.

Computer Systems Institute factors in students' attendance rate as part of their final grade. A student's attendance rate is calculated based on the number of hours of class time the student is marked present divided by the number of hours the student is scheduled to be present in the classroom.

Questions or concerns regarding attendance policies may be directed to the Course Instructor, Academic Dean, Program Manager or the Registrar's Office. The Course Instructor for a class is the only member of the Academic team that may enter or modify attendance for any given class while it is in session. The Registrar's Office is the only other department in the school that also has this capability, primarily to be used in the cases of Course Instructor absence or Course Instructor request. Upon completion of the class session, the ability to modify attendance records is limited to the Registrar's Office in order to correct errors as identified by the Course Instructor or identified by CSI in the event of the instructor's separation from it.

Attendance is taken and recorded daily and attendance records are maintained by the Registrar. In order to be considered present, students must physically attend the class at the location as designated by the Course Instructor and approved by CSI during the times established by the official course schedule.

ADDITIONAL ATTENDANCE REQUIREMENTS

Continuing students must attend at least one of their scheduled classes within 2 weeks of the quarter start date. Failure to meet this requirement will result in CSI administratively withdrawing the student from the program.

Skill Building, Language Programs, and Cultural Immersion Course Attendance Policy

During the academic term, students who fail to post attendance for at least one class for three consecutive weeks will be subject to administrative withdrawal on the 21st day of absence from their scheduled class. If the student fails to carry out CSI's procedures to "revert" this status, he or she will be officially administratively withdrawn by CSI. The student will then be ineligible to continue at Computer Systems Institute in his or her scheduled program.

To "revert" from the administrative withdrawal status, the student must meet with the Academic Dean or Designee, sign a low attendance warning, and post attendance in his or her next scheduled class immediately following the three-week period of absence.

Computer Technology, Healthcare Programs, and the Business Career Program Attendance Policy

During the academic term, students who fail to post attendance for at least one class for two consecutive weeks will be subject to administrative withdrawal on the 14th day of absence from their scheduled class. If the student fails to carry out CSI's procedures to "revert" this status, he or she will be officially administratively withdrawn by CSI. The student will then be ineligible to continue at Computer Systems Institute in his or her scheduled program.

To "revert" from the administrative withdrawal status, the student must meet with the Academic Dean or Designee, sign a low attendance warning, and post attendance in his or her next scheduled class immediately following the two-week period of absence.

Academic Dean or Designee Counseling

The purpose of the above-referenced meeting with the Academic Dean or his or her designee is to provide counseling and support to the student with excessive absences in order to: 1) identify the causes for the excessive absences; 2) assist the student with addressing such causes, such as assistance in finding affordable childcare or reliable transportation; and 3) to make a realistic assessment about the student's ability to successfully complete the program.

EXTERNSHIP

All students who lose their externship site during their academic term must self-report to Student Affairs. Failure to report may result in administrative withdrawal from the program and may affect student status. If the loss of employment occurs during the academic term, students are responsible for the remaining hours needed in externship to receive academic credit. Students are also responsible for ensuring a new externship is found and verified in a timely manner according to externship process. Failure to complete the required hours in the academic term may cause the student to fail the course and/or implicate their SAP progress. For SBA, SMP and AAP students, failing the Externship Course will result in the loss of externship eligibility in the subsequent quarter of the same program.

ATTENDANCE RECORDS

CSI maintains attendance records electronically for all programs. The computer attendance database is the official record of attendance. An appeal may be filed within five (5) calendar days following the end of a course/quarter to challenge a student's official record.

LEAVE OF ABSENCE (LOA)

Students granted an approved Leave of Absence can temporarily stop attendance in their program of study without affecting their satisfactory academic progress or being withdrawn from the school during the timeframe of an approved LOA.

Reasons for granting an approved leave of absence may include, but are not limited to:

- Illness or medical condition

LEAVE OF ABSENCE (LOA) – INTERNATIONAL STUDENT

Only an illness or other medical condition of the international student may justify an interruption in a full course of study (LOA).

- The medical condition must be substantiated by "medical documentation from licensed medical doctor, doctor of osteopathy, or licensed clinical psychologist."
- LOA can be granted for no more than 12 months in the aggregate during course of study.
- LOA authorizations for medical reasons must be approved by the DSO prior to the reduction in course load.

The DSO must reauthorize leave of absence every quarter. The regulations require the student to present current medical documentation to support each LOA authorization. If the interruption in studies caused by illness or medical conditions delay the student's completion of the course of study to a date beyond the completion period on Form I-20, care must be taken to extend the student's program and I-20 before the completion date.

Leave of Absence Request Procedures and Required Documentation

In order to be considered for an approved Leave of Absence (LOA), a student must submit the following documentation to the Student Affairs Department or Registrar's Office:

- Student Action Report (SAR) indicating the LOA's start and end dates must be signed by the student and a representative of Student Affairs or the Registrar's Office.
- Supporting documentation

Leave of Absence requests will not be approved if circumstances leading to the request are not likely to be resolved by the end of the requested LOA period, if supporting documentation is not provided, or if there is no indication that the student intends to return to school after the end of the LOA period.

Re-Admission Following a Leave of Absence

A student must return on the first day of the course/module immediately following the end of the approved LOA period and meet with Student Affairs or Registrar's Office representative to sign return from LOA SAR.

Failure to Return from a Leave of Absence

A student who fails to return from a LOA on or before the first day of the course/module immediately following the end of the approved LOA period will be withdrawn from Computer Systems Institute.

A student's last date of attendance prior to the approved LOA will be used in order to determine the amount of funds the Institution earned and make any refunds that may be required under federal, state, and institutional policies (see School Tuition Refund Policy). Payment arrangements must be made for any outstanding balances.

Additional Information for F-1 Students:

DSO approval is required for all Leave of Absence requests.

The DSO may authorize an extended LOA period for an aggregate of 12 months due to a student's medical condition. The student must provide current medical documentation from a licensed medical doctor, doctor of osteopathy, or licensed clinical psychologist to the DSO to substantiate the illness or medical condition and the DSO must reauthorize extended Leave of Absence each new module or quarter.

SCHEDULE CHANGES

Schedule changes can be requested through the Student Affairs Department and or Registrar's Office on campus.

Students can request a schedule change by the add/drop/schedule change dates published in the calendar. All schedule change requests are subject to seat availability and are not guaranteed. All schedule change requests are subject to \$25.00 fee if the request is approved. The fee is not refundable if a student cancels the request after the schedule change was processed. Approved and processed schedule changes are not guaranteed after the first week of the quarter if student's quarter tuition and fees have not been paid in full. If the approved early schedule change request is cancelled due to unpaid quarter tuition and fees, the \$25.00 schedule change fee will not be refunded. All holds on student records (Records Hold, Student Affairs and Business Office hold) must be resolved before schedule change requests can be approved.

CAMPUS CHANGES

Campus changes can be requested through the Student Affairs Department and or Registrar's Office on campus.

Students can request a campus change by the add/drop/schedule change dates published in the calendar. All campus change requests are subject to seat availability and are not guaranteed. All campus change requests are subject to \$25.00 fee if the request is approved. The fee is not refundable if a student cancels the request after the campus change was processed. Approved and processed campus changes are not guaranteed after the first week of the quarter if student's quarter tuition and fees have not been paid in full. If the approved early campus change request is cancelled due to unpaid quarter tuition and fees, the \$25.00 campus change fee will not be refunded. All holds on student records (Records Hold, Student Affairs and Business Office hold) must be resolved before campus change requests can be approved.

PROGRAM CHANGES

Program changes can be requested through the Student Affairs Department and or Registrar's Office on campus. All program changes must be requested in writing prior to the start of a module, course or quarter. Students may not attend a new program without approval. Students on an F-1 student visa need to receive approval from Academics, Registrar, Business Office, and DSO Departments. Under normal circumstances, the student will be able to start attending classes on the first day of the next available module/course/quarter. The Academic Dean or Registrar can postpone or deny the requested program change due to limited course availability or classroom space.

All applicable courses will be transferred to the new program. Students who change programs may incur additional charges that reflect the new program tuition and fees.

The following limits apply to program changes:

Type of Programs	Students in Good Academic Standing	Students Not Meeting SAP
Skill Building	3 times during continuous enrollment	1 time during continuous enrollment
ESL	3 times during continuous enrollment	1 time during continuous enrollment
CS Foundation	3 times during continuous enrollment	1 time during continuous enrollment
CS Essential	3 times during continuous enrollment	1 time during continuous enrollment
CS Expert	3 times during continuous enrollment	1 time during continuous enrollment
Business Career Program	3 times during continuous enrollment	1 time during continuous enrollment
Healthcare Career Program	3 times during continuous enrollment	1 time during continuous enrollment
Networking Career Program	3 times during continuous enrollment	1 time during continuous enrollment

WITHDRAWAL FROM SCHOOL

An official withdrawal from Computer Systems Institute will be documented in writing through the Student Affairs Department. Students intending to withdraw are asked to notify the Student Affairs Department by telephone, in person, or in writing to provide official notification. During the withdrawal process, students are asked to provide the official date of withdrawal and the reason for withdrawing in writing. Once the process of withdrawal begins, the student or a staff member of the Student Affairs Department will complete all necessary form(s).

DATE OF DETERMINATION (DOD)

The date of determination (DOD) is the date CSI determines that a student will not return to class. **See refund policy for more details.**

Business Career, Healthcare Career, Networking Career, CS Foundation and CS Essential, the DOD is the earliest of the following three (3) dates:

- The date the student notifies CSI (verbally or in writing) that he or she is not returning to class
- The date the student is dismissed from the Institute
- The date that is no later than the fourteenth calendar day after the last date of attendance (LDA)

Scheduled breaks of 5 days or more are excluded when calculating the DOD. For students who fail to return after an official Leave of Absence (LOA), the DOD is the date the student was scheduled to return to class.

For Skill Building and English as Second Language programs, the DOD is the earliest of the following three (3) dates:

- The date the student notifies CSI (verbally or in writing) that he or she is not returning to class
- The date the student is dismissed from the Institute
- The date that is no later than the twenty-first calendar day after the last date of attendance (LDA).

Scheduled breaks of 5 days or more are excluded when calculating the DOD.

For students who fail to return after an official Leave of Absence (LOA), the DOD is the date the student was scheduled to return to class.

ADVANCEMENT AND GRADUATION

The following general policies apply to advancement and graduation:

- All students are bound by the course catalog under which they matriculate
- All students must meet their administrative and financial obligations to the Institute before being allowed to receive their Certificate of Completion, official transcript or take future certifications
- Payment arrangements must be made on any outstanding balances at the time of completion of the program

MINIMUM REQUIREMENTS FOR GRADUATION

The minimum requirement for graduation is a cumulative grade point average (CGPA) of 2.00 and a completion rate of 66.67% of the program. Students not meeting the 2.00 CGPA requirement at the end of their program of study will be considered not meeting graduation requirements and will be processed as completers. Students who completed their program but did not meet graduation requirements will not be issued a Certificate of Completion but are eligible to receive an official transcript.

TIME LIMITS FOR COMPLETION OF PROGRAMS

CSI requires that all students maintain a completion rate of 66.67% in order to complete their course requirements within a maximum of 150% of their program's prescribed length.

LATE WORK POLICY

Students will be assessed a penalty of 10 points on any late work submitted past the assigned due date. The assigned due date will be one week after the work was assigned. No work will be accepted after the last class meeting of the quarter. *

*effective 1/9/17

GRADING SCALE

A=100-90	Quality Points	4.00
B=89-80	Quality Points	3.00
C=79-70	Quality Points	2.00
F=69 and below	Quality Points	0.00

OTHER GRADE DEFINITIONS

GRADE	DEFINITION OF GRADE	DESCRIPTION OF GRADE	GPA CALCULATION
AU	Audit	The student has audited the course.	Not calculated in the GPA
FAIL*	Fail	The student has taken the course on a pass/fail basis and failed to earn credit.	Not calculated in the GPA
I	Incomplete	Some coursework outstanding	Not calculated in the GPA
IP	In Progress	A grade was not available at the time the transcript was printed.	Not calculated in the GPA
PASS	Pass	The student has taken the course on a pass/fail basis and earned credit.	Not calculated in the GPA
TR	Transfer Credit	Credits accepted for transfer	Not calculated in the GPA
W	Withdrawal	The student has withdrawn from the module.	Not calculated in the GPA
WD*	Withdrawn Dropped	Student withdrew from school	Not calculated in the GPA

*Effective 12/01/12

GRADE FORGIVENESS POLICY

(Policy applies to students with enrollment date prior to 8/11/2014)

Once a student passes a previously failed class, the previous grade(s) of "F" is no longer calculated toward GPA and CGPA.

The repeated course (or the renumbered substitute for that course) must be passed at Computer Systems Institute.

Grades of "W", "WD", "PASS", "I", "TR", or "AU" may not replace previous "F" grades. Only a regular letter grade of "A", "B" or "C" can be used to replace the forgiven grade(s).

All the grades will appear on the transcript, but only the final passing grade will be used in computing GPA and CGPA. On the transcript, grades excluded from GPA and CGPA calculation will appear to the right of the number in the Attempted Hours column.

In-program honors (Honor Roll, Dean's or President's honor lists), Academic Standing (warning, probation, suspension), or previous grade point totals will not change retroactively as a result of applying this policy. This policy does not supersede established policies for Satisfactory Academic Progress or other GPA/CGPA requirements set by Federal or state laws and regulations.

INCOMPLETE GRADE POLICY

An "I" (Incomplete) is a temporary grade, which may be given at the Academic Dean or designee's discretion if the following criteria are met:

- At least 70 percent of the required course work is completed
- Required work may be reasonably completed within 30 days of the final grade due date
- The Incomplete grade is not given as a substitute for a failing grade
- The Incomplete grade is not based solely on a student's failure to complete work or as a means of raising his or her grade by doing additional work after the grade report time
- The student initiates the request for an Incomplete grade prior to the end of a module by meeting with the Academic Dean or designee
- If the Academic Dean or designee agrees to granting an incomplete, the classroom instructor and the student will coordinate an Incomplete Grade Contract Form with specific requirements prior to the end of the module

- Business Career, Healthcare Career, Networking Career, CS Foundation, CS Essential and CS Expert students who missed the final exam/quiz, but otherwise have a passing grade in all other grade book categories have 3 business days after grade submission deadline to complete the final exam if approved by the Academic Dean or designee
- Skill Building and English as a Second Language program students have 10 business days after the last day of the quarter to complete the final exam
- Skill Building students, who intend to enroll in a new program, must complete all required work prior to the registration deadline of the next program.

Appropriate grades must be assigned in all other circumstances. A student who receives a grade of Incomplete must progress to the next course while simultaneously completing the outstanding work for the course with the grade of Incomplete. A grade of Incomplete cannot be awarded in place of a failing grade when a student is required to repeat a course. An Incomplete grade is not calculated toward a student's GPA/CGPA. Additionally, an Incomplete grade may not be considered a passing grade for purposes of determining academic standing or for other purposes.

Procedure for Requesting an Incomplete Grade

1. The student contacts the Academic Dean or designee and explains the need for an Incomplete
2. If the Academic Dean or designee grants the request, he or she completes an Incomplete Grade Contract Form
3. The Academic Dean or designee and the student sign the Incomplete Grade Contract Form

The purpose of the Incomplete Grade Contract Form is to list the coursework that the student must complete by a certain date in order for the Incomplete to be removed and replaced with a grade. Both the Academic Dean or designee and the student are required to sign the form and retain a copy.

Once the course work is completed and the Academic Dean or designee assigns the appropriate grade on a Change of Grade Form, it is submitted to the Registrar's Office for processing. The new grade will be included in the calculation of the GPA/CGPA.

The grade change will appear only on the student's transcript. The final grade roster and the grade book will continue to show the original grade submitted for the course. Reported final grade(s) may not be changed based on reexamination, completion of additional work, or re-evaluation of existing work.

GRADE CHANGE POLICY

Grades reported by faculty members are generally considered permanent and final; however, there are circumstances in which a grade change may be requested. Typical reasons include:

- A correction to a clerical or a procedural error
- The replacement of an incomplete grade with the appropriate final grade

Deadlines for grade changes can be found in the table below:

TYPE OF GRADE CHANGE	TIMELINE
A passing grade to a failing grade	Within 5 days of the next course
A failing grade to a passing grade	Within 5 days of the next course
A grade of Incomplete to a passing grade	Within 30 days of the final grade due date
A passing grade to a passing grade	Within 30 days of the final grade due date

The grade change(s) will appear only on the student's transcript. The final grade roster and the grade book will continue to show the original grade submitted for the course.

A correctly reported final grade may not be changed based on reexamination, completion of additional work, or reevaluation of existing work.

Procedure for Implementing a Grade Change

1. The student contacts the Academic Dean or designee and explains the need for a grade change
2. If the Academic Dean or designee grants the request, he/she completes a Grade Change Form
3. The completed Grade Change Form is forwarded to the Registrar's Office
4. The Registrar's Office processes all approved grade changes within two business days
5. All processed grade changes are viewable through the My Progress Portal the next business day

GRADE APPEAL

The purpose of a grade appeal is to allow students to dispute an alleged academic injustice related to a final grade. This action is appropriate only when there is alleged arbitrary and capricious behavior on the part of the instructor.

Arbitrary behavior refers to a grading decision for which there is no sound academic reason or when a decision is based solely on preference or whim.

Capricious behavior refers to a grading decision not based on a reasonable and announced grading policy or procedure.

Grade Appeal Procedure

1. Students wishing to appeal a course grade should obtain a Grade Appeal Form from the Academic Dean's Office or the Registrar's Office
2. Once the student completes the Grade Appeal Form, he/she must submit it to the Academic Dean or designee
3. The Grade Appeal Committee consisting of the Academic Dean or designee and the Registrar or designee reviews the Grade Appeal Form within three business days of receipt of the appeal. The decision of the Grade Appeal Committee is final and cannot be appealed
4. If a grade change is granted, the Grade Change Form is forwarded to the Registrar's Office by the Academic Dean or designee
5. The Registrar's Office will process all approved grade changes within two business days, and the updated grade will be viewable through the My Progress Portal the next business day
6. If the grade appeal is denied, the Grade Appeal Form with an attached explanation will be submitted to Registrar's Office by the Academic Dean or designee
7. The Academic Dean or designee will notify students of the outcome of their grade appeal

TRANSCRIPTS AND STUDENT RECORDS

CSI maintains student records in accordance with the requirements of all governing bodies. Upon successful completion of their program, students will receive a Certificate of Completion, provided they do not have any administrative, financial or academic holds with CSI.

CSI issues two types of transcripts:

1. Official transcripts, the content of which is signed by the Registrar with the official seal of CSI
2. Unofficial transcripts stamped "Unofficial Transcript," or "Unofficial Issued to Student"

Students may request their academic transcript at any time from Registrar's Office.

- Official Transcripts will not be issued to current or former students with an outstanding balance
- Official transcripts and reissued Certificates of Completion cost **\$5 per copy**

- Design, wording, and signatures on the replacement Certificate of Completion will be those currently in use by the Institute and may be different from the ones printed on the original Certificate of Completion.
- Official transcript requests should be emailed to TranscriptRequest@csinow.com or sent via U.S. Mail to:

Computer Systems Institute
 Registrar's Office
 8930 Gross Point Road
 Skokie, IL 60077

SATISFACTORY ACADEMIC PROGRESS (SAP)

The Satisfactory Academic Progress policy applies to all students enrolled in all programs offered at Computer Systems Institute. All periods of a student's enrollment at CSI are used in determining Satisfactory Academic Progress.

Evaluation Points

For the purpose of determining overall satisfactory academic progress, CSI programs are divided into evaluation periods. The evaluation period is the period between two evaluation points.

CS Foundation, CS Essential programs, CS Expert and Business, Healthcare, and Networking Career Programs, satisfactory academic progress is evaluated at 25% of the normal program length and then at the end of each payment period.

- Normal Program Length – 36 quarter credits
- 25% of the normal program length – at least 9 quarter credits attempted

For Customer Service Specialist, Hospitality Industry Professional, Administrative Assistant Professional, Sales and Marketing Professional, and Small Business Administrator Programs, satisfactory academic progress is evaluated at the end of each quarter.

- Normal Program Length – 48 quarter credits

For Beginner ESL, Intermediate ESL, Advanced ESL, General Writing, Literature, and Communication Programs, satisfactory academic progress is evaluated at the end of each quarter.

- Normal Program Length – 36 quarter credits

Satisfactory Academic Progress is measured by:

- 1) A student's cumulative grade point average (CGPA) – a qualitative component
- 2) A student's pace of completion (progress toward the completion of their program, completion rate) – a quantitative component

To be considered as making satisfactory academic progress, a student must achieve minimum requirements for both CGPA and pace of completion at each evaluation point according to the charts below:

CS Foundation, CS Essential, CS Expert and Career Programs SAP Requirements (both requirements must be met)	25% of the normal program length	End of the 1st payment period/ midpoint	End of the 2nd payment period
CGPA	1.5	2.00	2.00
Pace of completion	50%	66.67%	66.67%

CSS, HIP, AAP, SBA, SMP Programs SAP Requirements (both requirements must be met)	End of 1st quarter	End of 2nd quarter	End of the 3rd and all consecutive quarters within 150% of the Program Length
CGPA	2.0	2.00	2.00
Pace of completion	100%	50%	66.67%

Beginner ESL, Intermediate ESL, Advanced ESL, and General Writing, Literature, Communication Programs SAP Requirements (both requirements must be met)	End of 1st quarter	End of 2nd quarter	End of the 3rd and all consecutive quarters within 150% of the Program Length
CGPA	2.0	2.00	2.00
Pace of completion	100%	50%	66.67%

SAP Evaluation Procedures

The following actions will occur at each SAP evaluation point:

1. Each student's CGPA is reviewed to determine if the student is meeting the minimum SAP standard
2. Each student's pace of completion is reviewed to determine if the student is meeting the minimum SAP standard

SAP Warning

Students who are not meeting SAP for the first time will be placed on SAP Warning status until the end of the evaluation period. A student may not be granted consecutive SAP warning statuses.

SAP Warning status is assigned without an appeal or other action needed by the student. Students will be notified within five business days of being placed on SAP Warning status. Students on SAP Warning are encouraged to participate in academic advising. Students placed on SAP Warning and still failing to meet SAP standards at the next evaluation point will be academically suspended and must appeal in order to remain in the program of study.

Appeal Due to Mitigating Circumstances

A student may appeal academic suspension if extenuating circumstances interfered with student's ability to meet Satisfactory Academic Progress standards. An appeal letter addressed to SAP Committee must include an explanation of the circumstances that caused the student's unsatisfactory progress, as well as what has changed in the student's situation that would result in the improvement of progress. The student must be able to provide documentation to support mitigating circumstances.

Circumstances must meet one of the following criteria:

- Prolonged illness, medical condition, or injury to student or an immediate family member
- Death of an immediate family member
- Other extenuating circumstances beyond the student's control

Documentation may include but is not limited to:

- Physician's letters and hospital records
- Death certificate or obituary
- Court or police documents
- Letters from third-party professionals on their letterhead

The appeal may not be based upon the lack of knowledge of SAP standards or the lack of knowledge that the student's F-1 status was in jeopardy.

Appeal Process and Deadlines

Appeal Submission Deadlines	
CS Foundation, CS Essential, CS Expert and Career Programs	5 business days following the SAP Suspension notice
Customer Service Specialist, Hospitality Industry Professional, Administrative Assistant Professional, Sales and Marketing Professional, Small Business Administrator, Beginner ESL, Intermediate ESL, Advanced ESL, General Writing, Literature, and Communication Program	By the 10 th business day of the quarter immediately following the quarter in which the student was placed on SAP Suspension

To appeal the student must:

- 1) Submit an appeal letter addressed to SAP Committee by the deadline
- 2) Attach official documentation of the mitigating circumstances that affected the student's academic performance
- 3) Continue to attend regularly-scheduled classes while the appeal is under review

If an appeal is not submitted by the deadline, the student will be academically dismissed and must request readmission through standard admission procedures.

All appeals will be reviewed within five business days of the appeal submission. The Registrar's Office will provide notice to the student concerning the result of the student's appeal within three business days following the decision. The notice will be sent to student's csinow.edu email account.

If the appeal is approved, the student will be placed on SAP Probation for one evaluation period.

If the appeal is denied, the student will be academically dismissed. Students who are dismissed due to denied suspension appeal are not able to reenroll into the school for 180 days from their last day of attendance in the program from which they were dismissed. (See procedures for Reestablishing Satisfactory Academic Progress)

SAP Probation

SAP Probation is a Status assigned to a student who fails to make satisfactory academic progress and who has successfully appealed and has had his or her enrollment reinstated for one evaluation period. Students on SAP Probation must participate in academic advising as deemed necessary by the school as a condition of their probation. Students placed on SAP Probation who are not meeting SAP at the next evaluation point may be eligible to have their Probation status extended for one consecutive evaluation period at a time if they are meeting the conditions of their Academic Recovery Plan.

Academic Advising

Students on SAP Probation must participate in academic advising as deemed necessary by the school as a condition of their status.

Academic advising includes but is not limited to the following:

1. Students must meet with their Instructor and/or Program Manager and/or Academic Dean to complete an Academic Recovery Plan
2. Students may have to participate in tutoring if deemed necessary by the Instructor and/or Program Manager and/or Academic Dean

Procedures for Reestablishing Satisfactory Academic Progress

If a student is not meeting SAP requirements after one probationary period, he or she will be academically dismissed. Students whose CGPA met SAP standards at the moment of dismissal but whose pace of completion was below SAP standards may reestablish their Satisfactory Academic progress.

Maximum Time Frame

Students who fail to complete the program within 150 percent of the program length will be academically dismissed from Computer Systems Institute due to exceeding Maximum Time Frame (MTF). Students dismissed due to exceeding MTF may return to Computer Systems Institute and reapply for admission after 180 days from their last day of attendance in the program from which they were dismissed. Students will need to go through all the steps of the admissions process.

Graduation Requirements and SAP

Students who are not meeting 2.00 CGPA requirements at the end of their program of study will be considered completers. A completer is a student who has attempted and earned the maximum allowable number of credits for the program of study but did not meet a graduation requirement of a 2.00 CGPA in the program.

Calendar System, Academic Year

Computer Systems Institute's Calendar System and Academic Year differ by program. Students should use the chart below to determine calendar system and academic year length of their program of study

Program Name	Calendar System	Academic Year
CS Foundation Program CS Essential Program CS Expert Career Programs	Nontraditional/Non-term	Nontraditional/Non-term
Beginner ESL Program Intermediate ESL Program Advanced ESL Program Communication Program General Writing Program Literature Program	Quarter	3 Quarters
Customer Service Specialist, Hospitality Industry Professional, Administrative Assistant Professional, Sales and Marketing Professional, Small Business Administrator Programs	Quarter	4 Quarters

Quarter Definition

Computer Systems Institute defines Quarter as an Academic Calendar unit at least 10 instructional weeks long

Credit Hour Definition

All credit hours are calculated based on quarter credit hours. One-quarter credit hour equals, at a minimum, 10 classroom hours of lecture, 20 hours of laboratory, and 30 hours of practicum. The formula

for calculating the number of quarter credit hours for each course is: (hours of lecture/10) + (hours of lab/20) + (hours of practicum/30).

Contact Hour Definition

CSI provides 55 minutes of supervised or directed instruction and 5-minute breaks for every hour of instruction.

Published Program Length

Published program length is the amount of quarter credit hours or clock hours required to complete the program of study as defined in the CSI Academic Catalog for each program.

Maximum Time Frame

Maximum Time Frame (MTF) is a period that is no longer than 150% of the published length of the education program.

For example, students enrolled in a program that is 36-quarter credits long have to complete all program requirements successfully and earn 36 credits within a maximum of 54 credits attempted. Therefore, to meet maximum time frame, students enrolled in a 36-credit hour program cannot fail and/or withdraw from more than 18 credits.

The tables below shows the minimum number of earned credits required at different points of program completion to successfully meet the SAP requirement of a minimum 66.67% completion rate.

CS Foundation, CS Essential Programs, CS Expert, Business Career Program, Healthcare Career Program, Networking Career Program:

Definitions and Formulas for CGPA Calculation

Quality Points

Quality Points are points that are assigned to every course for which a student receives an A, B, C or F letter grade (A = 4, B = 3, C = 2, F = 0)

Grade Point Factor/ Grade Points

Each course's Grade Point Factor (or Grade Points) can be calculated by multiplying quality points assigned to the course by the number of credits the course is worth. For example, a 4.5 credit course for which a student receives a grade of C is worth 9 Grade Points (2 x 4.5)

CGPA Calculation

1. Convert each letter grade to its applicable number of quality points (A = 4, B = 3, C = 2, F = 0)
2. Calculate Grade Points for each of the attempted courses by multiplying quality points by course credits
3. Calculate total Grade Points by adding up Grade Points for each of the attempted courses
4. Calculate total Attempted Credits by adding up course credits for each of the attempted courses
5. Calculate CGPA by dividing Total number of Grade Points by Total number of Attempted Credits

For example, a student who took 4 courses worth 4.5 credits each and received two A's, an F and a C will have the following CGPA calculation:

1. *Convert each letter grade to its applicable number of quality points: A = 4, A = 4, F = 0, C = 2*
2. *Calculate Grade Points for each of the attempted courses by multiplying quality points by course credits:*
Course 1 Grade Points for A grade: $4 \times 4.5 = 18$
Course 2 Grade Points for A grade: $4 \times 4.5 = 18$
Course 3 Grade Points for F grade: $0 \times 4.5 = 0$
Course 4 Grade Points for C grade: $2 \times 4.5 = 9$
3. *Calculate total number of Grade Points by adding up Grade Points for each of the attempted courses:*
 $18 + 18 + 0 + 9 = 45$
4. *Calculate total Attempted Credits by adding up course credits for each of the attempted courses:*
 $4.5 + 4.5 + 4.5 + 4.5 = 18$
5. *Calculate CGPA by dividing total number of Grade Points by total number of Attempted Credits:*
 $45 / 18 = 2.5$ CGPA

Definitions and Formulas for Pace of Completion Calculation

Attempted/Scheduled Credits

Any credit for which a grade of A, B, C, F, I (Incomplete), W, WD or TR was awarded.

Earned/Completed Credits

Any credit for which a grade of A, B, C, or TR was awarded.

Pace of Completion Calculation

1. Calculate total number of Earned Credits
2. Calculate total number of Attempted Credits
3. Calculate Pace of Completion percentage by dividing total number of Earned Credits by total number of Attempted Credits and multiplying the result by 100

For example, a student who took 4 courses worth 4.5 credits each and received two A's, an F and a C will have the following pace of completion calculation:

1. *Calculate total number of Earned Credits:*

Course 1 earned credits for A grade = 4.5

Course 2 earned credits for A grade = 4.5

Course 3 earned credits for F grade = 0

Course 4 earned credits for C grade = 4.5

$4.5 + 4.5 + 4.5 = 13.5$ credits earned

2. *Calculate total number of Attempted Credits:*

Course 1 attempted credits for A grade = 4.5

Course 2 attempted credits for A grade = 4.5

Course 3 attempted credits for F grade = 4.5

Course 4 attempted credits for C grade = 4.5

$1.5 + 4.5 + 4.5 + 4.5 = 18$ credits attempted

3. *Calculate Pace of Completion percentage by dividing total number of Earned Credits by total number of Attempted Credits and multiplying the result by 100:*

$13.5 / 18 \times 100 = 75\%$

Grading Scale and CGPA/Pace of Completion Calculation

Grades	CGPA Calculation	Pace of Completion Calculation
A	Calculated	Calculated as attempted and earned
B	Calculated	Calculated as attempted and earned
C	Calculated	Calculated as attempted and earned
F	Calculated	Calculated as attempted, not earned
AU	Not Calculated	Not Calculated
FAIL	Not Calculated	Calculated as attempted, not earned
I	Not Calculated	Not Calculated
IP	Not Calculated	Not Calculated
PASS	Not Calculated	Calculated as attempted, not earned
TR	Not Calculated	Calculated as attempted and earned
W	Not Calculated	Not Calculated
WD	Not Calculated	Not Calculated

SAP and Repeat Grade and Grade Forgiveness Policies

All grades are considered when assessing both qualitative and quantitative components of a student's Satisfactory Academic Progress.

Program Changes

In the event of a program change, Computer Systems Institute will transfer all relevant courses successfully completed in the old program toward the new program of study. A grade of TR will be assigned to all transferred courses. Courses not accepted for transfer will not count toward CGPA or pace of completion in the new program. Students not meeting SAP at the time of the program change are allowed to change the programs and consequently "reset" SAP only one time during their continuous enrollment at Computer Systems Institute.

Additional Programs

If a student graduates from one program and desires to earn an additional Certificate of Completion in another program, Computer Systems Institute will transfer all relevant courses successfully completed in the previous program of study toward the new program. A grade of TR will be assigned to all transferred courses. Courses not accepted for transfer will not count toward CGPA or pace of completion in the new program.

Incomplete

Classes with a grade of Incomplete are not calculated toward CGPA. They are calculated toward the pace of completion as attempted but not earned credits.

Transfer Credits

Transfer Credit Hours (indicated by a TR grade on the student's record) are treated as both attempted and completed hours in the determination of the student's pace of completion. Transfer credits are not included in the CGPA calculation.

Withdrawal from a Course

Students who withdraw from a course will receive a grade of "W" or "WD" on their record. Withdrawals are treated as attempted but not completed hours in the determination of the student's pace of completion. Withdrawals are not included in the CGPA calculation.

Remedial Courses, Non-credit Courses, or Pass/Fail Courses

Remedial courses, non-credit courses, or pass/fail courses are not included in the calculation of a student's CGPA and completion rate.

Experiential Learning, Advanced Academic Standing, Credit by Examination

No credit is given for experiential learning. CSI does not allow for testing for an advanced academic standing nor does it award credit by examination.

Academic Dismissal

Academic dismissal is dismissal from the school due to not meeting SAP requirements as defined in the CSI Academic Catalog.

GRADUATION REQUIREMENTS

Students must successfully complete all of the courses required for their programs with a minimum of a 2.0 CGPA and 66.67% completion rate. All financial obligations must be complete. A Certificate of Completion and official transcript will be granted upon graduation.

¹A course of instruction is a standalone course that meets for a period of time and provides instruction that may or may not be related to a program of study, but is either not part of the sequence or can be taken independent of the full sequence as a stand-alone option. A Course of Instruction may directly prepare students for a certificate or other completion credential or it can stand alone as an optional preparation or, in the case of students requiring catch-up work, a prerequisite for a program. A stand-alone course might lead to a credential to be used toward preparing individuals for a trade, occupation, vocation, profession; or it might improve, enhance or add to skills and abilities related to occupational/career opportunities.

“N/A” Not Available due to graduates having F1 status and not eligible to work in the US.

Programs with zeros listed in Total Number Admitted column did not have enrollment in 2018-2019 reporting period.

FIELD TRIP/EMERGENCY SAFETY PROCEDURE

Before the Field Trip

1. Students will fill out emergency contact information and waiver of claims and release from liability forms before the field trip begins and submit the documents to their instructor.
2. Instructors will review the emergency contact information to confirm it is not another student in the same class.
3. The instructor should fill out the CSI Student Emergency Contact List form with all of the students' names attending and their emergency contact/s. This form will be in the instructor's possession during the field trip. The CSI Student Emergency Contact List will be submitted to the Academic Office after the field trip.

During the Field Trip

1. During the field trip, the instructor should determine the nature of the emergency that occurs and the number of students and staff affected.
2. If possible, the instructor should gather students and move them toward a safe location away from where the incident is occurring or has occurred.
3. If somebody has been injured during the field trip, the instructor will call 911.
4. The instructor will contact the emergency contact of student(s) injured.
5. Document the events that have occurred on the Incident/Accident Report Form.
6. Inform the Academic Dean or Designee by phone or email of the events that have occurred.
7. Submit the completed Incident/Accident Report form to the Academic Dean or Designee for review.

After the Field Trip

1. Meet with the Academic Dean and the Director of Academics to review the Incident/Accident Report in its entirety.
2. Determine an action plan for student(s) injured during the field trip regarding assignment submission and possible incomplete.
3. File Incident/Accident Report with Director of Academics after meeting.
4. Any student related documentation will be saved to their SchoolDocs account.
5. The student will be contacted by the Academic Dean and the Student Affairs Advisor to follow up on his/her health status. The status report is added to the student's SchoolDocs account.

ACADEMIC HONESTY POLICY

As an educational institution, Computer Systems Institute expects all students, instructors, and staff to conform to the acceptable standards of academic integrity and to exhibit honesty and competency in their academic work. Academic dishonesty is a violation of school policy and has serious consequences.

There are two main types of academic dishonesty: **cheating** and **plagiarism**.

- **Cheating:** Cheating on exams, tests, quizzes, papers, or other assignments consists of knowingly giving, receiving, using, or attempting to give, receive, or use unauthorized assistance. Generally, assistance is considered unauthorized unless the course instructor specifically allows it. When in doubt, ask the instructor.
- **Plagiarism:** Plagiarism is a form of cheating. It is using another person's words, ideas, images, or music in written or oral communication to give the impression that these words or ideas are the student's own original thoughts. Plagiarism occurs when a student does not credit the original author for ideas and/or statements. It includes using direct quotations without quotation marks (" ") as well as using another person's ideas without giving the person credit by stating the source of the ideas or information (the name of the creator and where the content was found). To include ideas or content from any other source in your work, you must specifically cite it. "Cite" means to state who said, wrote or created it, and where you found it.

Students must pay special attention when taking information off the Internet, and must never include text or content—including music and pictures—created by another person or organization and present it as if it is their own work. Students are explicitly prohibited from buying, borrowing, or revising another student's work and submitting it as their own work.

If you are not sure if something is plagiarism, ask an instructor.

Penalties for Academic Dishonesty:

- **First Offense:** The first time a student is found to have plagiarized or cheated, s/he will receive a failing grade (zero) for the assignment and must schedule a time to meet with the instructor to discuss the incident. After meeting with the course instructor, the student shall have one opportunity to make up the assignment and/or exam. Ten (10) points shall be subtracted from the final grade of the re-submitted exam or assignment.
- **Second Offense:** If the student is suspected of violating the Academic Honesty Policy a second time during a course, the student will receive a failing grade (zero) on the assignment or exam and will be required to meet with the Academic Dean or Program Manager/Program Lead.
- **Third Offense:** If an instructor or administrator believes that a particular incident or set of incidents, including multiple incidents of plagiarism or cheating, is so serious that additional disciplinary action should be considered, that faculty member shall inform the Academic Dean. The Academic Dean, in consultation with at least two other administrators, such as the Regional Campus President and/or the Director of Academics, will assess the situation and jointly determine the appropriate course of action. Appropriate punishment may range from entering a failing grade (zero) for the assignment or exam without the opportunity to make it up or receiving a failing grade for the entire course, or dismissal from the institute.

If a student believes that an instructor's decision is arbitrary, discriminatory, or did not follow official procedures, s/he can submit an appeal to the Academic Dean within seven (7) days of being notified of a grade. The Academic Dean will review the matter, consult with appropriate faculty and administrators, and issue a decision within seven (7) days of the submitted appeal.

Business Programs

CUSTOMER SERVICE SPECIALIST (CSS)

Professional customer relationship management through effective customer service is an emerging specialty that requires understanding and mastery of a wide array of skills and competencies. The Customer Service Specialist program prepares students as customer service professionals with foundational skills in human relations, organizational metrics, business communications, customer data analytics and applied information technology. The program's theory and practice is delivered through classroom lecture and activities that reflect the diverse (international and multi-cultural) environment of modern businesses and organizations. Classroom instruction can be supplemented by externship experiences in various customer service positions. The CSS Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students will receive a certificate of completion.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

REQUIRED COURSES FOR COMPLETION

Course ID	Course Title	Lecture (A)	Lab (B)	Externship (C)	Total Contact Hours (A+B+C)	Quarter Credit Hours

CSS120	Professional Communication/Call Center	80	20	90	190	12
CSS145	Case Studies in Customer Service	80	20	90	190	12
CSS140	Customer Service as a Career	40	0	250	290	12
PROGRAM TOTALS		280	60	520	860	48

Additional Information

Training Methods	Lectures/Labs/Externship Activities
Program Length in quarters/weeks	4 Quarters or 44 academic weeks, which include 40 academic weeks and four administrative weeks.
Contact Hours	860 contact hours
Program Length in Quarter Credit Hours	48 quarter credit hours

Campuses Offering the CSS Program

This program is offered at Skokie, Chicago, and Lombard campuses.

Externship

Externship is an integral part of the education process for this program and is required.

CSS110: Customer Relationship Management

Students will be introduced to theories, principles, strategies, initiatives and resources to establish, maintain and project successful customer relationships in a growing business enterprise. Course content is derived from a variety of resources regarding the value of customer relationship management, customer data portfolio analysis, and awareness and respect for customer intimacy and loyalty. Through lecture, projects, and externship opportunities students will acquire and develop analytical thinking skills.

CSS120: Professional Communication/Call Center

During this course of study, emphasis will be given to the development of active communication and listening skills and effective customer service interactions through the telephone, e-mails, social media and face to face. Through lecture, projects and externship activities, students will gain understanding of the specialized knowledge, systems and resources required to develop and maintain a centralized customer relations enterprise that supports business and organizational objectives.

CSS140: Customer Service as a Career

The course materials utilize theoretical resources from psychology and contemporary models of human behavior to reinforce the value of a methodical approach to managing customer relationships. Students will survey and develop a broad understanding of the diverse array of opportunities derived from an education in customer service management. Through lecture, projects, and externships, students will review case studies of real and hypothetical businesses with a focus on customer service concepts and principles. Students will explore practical applications of customer service within various career fields.

CSS145: Case Studies in Customer Service

Through case studies of actual and hypothetical enterprises, students will examine the growth and depth of customer service professionalism, its theoretical basis, principles, ethics and fulfillments. The concepts presented through this culminating case study method include creating and nurturing the service culture in an organization; optimal verbal and written skills of the customer service professional; behavioral styles that augment customer service management; service breakdowns and recovery and the information technology resources necessary to achieve and sustain customer satisfaction and loyalty. Through lecture, projects, and externships, students will review case studies of a real and hypothetical business with a focus on customer service concepts and principles.

HOSPITALITY INDUSTRY PROFESSIONAL (HIP)

This program provides foundational theories and skills development in the hospitality industry (hotel, gaming, food, travel). Lectures, classroom discussions, literature review and externships will develop broader understanding of the history and traditions of the hospitality industry. The coursework enables the student to bring professionalism to their roles in the hospitality sector. The HIP Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students will receive a certificate of completion.

Program Length in Quarter Credit Hours	48 quarter credit hours

Campuses Offering the HIP Program

This program is offered at Skokie, Chicago, and Lombard campuses.

Externship

Externship is an integral part of the education process for this program and is required.

HIP110: Quality Service and Reception

Through lectures, projects, and externships, students will be encouraged to master the key terminology of the discipline of guest services; understanding the nature of quality service, gaining appreciation for how to match customer experience with customer expectations through information, customer feedback, data analysis, industry and competitor trend awareness. Students will examine companies such as Walt Disney, Marriott International Hotel, Ritz-Carlton Hotel, Daren Restaurants, Southwest Airlines to obtain practical knowledge and business best practices. The course also includes conducting online research on specific hospitality organizations and analyze and discuss various issues associated with hospitality topics.

HIP120: Food Service

Coursework provides survey of menu planning, recipe standardization, facilities planning and design, managing a food services staff and internal controls. Students will gain in-depth knowledge and skills in food preparation and storage, and understand the sources and enforcement of food safety standards.

Through lecture, projects and externship experiences, students will gain a broad overview of the restaurant industry; survey of history, cultural elements, trends and emerging sources of innovation and entrepreneurship; supply chain management as it relates to the provisioning of safe, sanitary food served to the public.

HIP130: Case Studies in Hospitality Industry

The course provides students the opportunity to apply theories and principles of effective hospitality management through in-depth review of a series of hypothetical hotel and restaurant case studies. Through lectures, projects, and externships, students will analyze case studies to sharpen their critical thinking skills that illustrate front office operations, housekeeping, facilities, security and special event planning.

HIP140: Business Etiquette

The course materials present standards for dressing, uniform styles and utilization, hospitality etiquette and table manners for casual as well as fine dining experiences. Through lectures, projects, and externship experiences, the students are introduced to the behaviors and grooming habits that create good first impressions and sustain effective business-client relationships in a hospitality setting.

SMALL BUSINESS ADMINISTRATOR (SBA)

Launching and operating an effective small business embodies a unique skill set as well as courage, risk-taking and creativity. Entrepreneurs must possess strong awareness and understanding of the complex, sophisticated and dynamic disciplines that are required for even a sole proprietorship to be successful. The SBA program offers practical, real world experiences with leadership, management, marketing, financial and accounting knowledge sufficient to prepare students to contribute value to their own small business or the enterprise of a third-party owner. The SBA Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students will receive a certificate of completion.

Additional Information

Training Methods	Lectures/Labs/Externship Activities
Program Length	4 Quarters or 44 academic weeks, which include 40 academic weeks and four administrative weeks.
Contact Hours	490 contact hours without Externship and up to 760 contact hours with Externship taken in 3 academic quarters for course credit
Quarter Credit Hours	48 quarter credit hours with maximum of 57 quarter credit hours with externship

Externship

* Externship is optional for credit. It allows students to gain work experience in the field of study while earning academic credits. To participate in the externship course, a student **must** earn 12 credits in their first quarter in the program. Externship can be taken a maximum of three times for academic credit during program. A student can earn up to 9 academic credits from externship.

BM138: Introduction to Small Business

Introduces economic, management, data analytics, financial and accounting principles as the solid foundation for the modern entrepreneur. Course materials introduce students to the theory and practice of production modeling, including supply chain management; e-commerce, sales, marketing, advertising, community relations, social media and customer relationship management. Through lectures and projects, students will survey the elements of a successful business enterprise, including attention to sources of competition, the business cycle, forms of business ownership, effective organizational models and the development and application of leadership in a business setting.

BM146: Marketing Strategies for Small Businesses

This course provides a broad survey of the dynamic forces driving effective business responses to emerging markets, customer expectations and global trends as prepared by professional, sophisticated marketing managers and specialists. Course materials, lectures, and projects discuss an array of marketing fundamentals, including understanding consumer behavior, integrating market segmentation into strategic planning, and adapting to on-line sales and fulfillment modalities in a global, connected environment. Student will encounter perspectives on professional marketing ethics and social responsibility, as well as the fundamentals of business-to-business marketing and sales.

BM126: Bookkeeping

This course provides basic bookkeeping, practices, resources and applications to establish foundational competencies in recording, tracking, analyzing and reconciling the flow of funds into and out of the company, including payroll functions. Culminates in real-world application of digital technology to the resource management of local business or organization. Students will develop the ability to apply skills to business and accounting cycles, generate period reports and comprehend their meaning as it relates to the organization's financial resources.

BM155: Financial Services

The course materials offers a survey of the theories and principles that provide small business entrepreneurs with access to financial capital, and the legal, ethical and competitive risks that accompany financial management. Strong emphasis is placed on understanding the sources of capital available to small businesses, including venture capital for start-ups, debt financing, equity financing, government-sponsored. Students will gain basic understanding of how to project the firm's financial needs, deriving meaning from financial statements, pricing and credit decisions, and an exit strategy that enables the entrepreneur to harvest wealth from his/her business enterprise.

EXT120: Small Business Administrator Externship

Through direct experiential practical application, students will encounter the systems, practices, cultures and professionals who implement the management theories and disciplines necessary to create and sustain a successful small business. This workplace experience allows students to observe, catalog, inventory, analyze and interpret the art and science of entrepreneurship through journal entries, seminar discussions and feedback from the externship supervisor.

SALES AND MARKETING PROFESSIONAL (SMP)

The program establishes a solid theoretical and practical basis for the professional practice of sales and marketing in a contemporary setting. Students will be introduced to the information regarding the testing, measurement and evaluation of consumer and client behaviors, with focus on the acquisition and analysis of data. The coursework develops skills in applied psychology, professional marketing, interpersonal communications, public speaking and marketing through on-line networks and platforms. The SMP Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students will receive a certificate of completion.

Course materials introduce students to the theory and practice of production modeling, including supply chain management; e-commerce, sales, marketing, advertising, community relations, social media and customer relationship management. Through lectures and projects, students will survey the elements of a successful business enterprise, including attention to sources of competition, the business cycle, forms of business ownership, effective organizational models and the development and application of leadership in a business setting.

BM147: Social Media Marketing

Through lectures, projects and classroom activities, students will be introduced to the fundamental components of effective social media marketing, including best practices, ethics and standards, platforms and networking websites. Emphasis is placed on effective social media market planning, preparation and development of formal social media marketing plans, while demonstrating how to integrate with other sales and promotional activities. Explains the process and strategy behind content creation and content management, and their application to mobile devices, video and photo-based social media networks.

SM110: Communication for Sales

The course establishes a foundation for effective relationship-based sales and marketing as a strategic, sustainable method to attract and retain a loyal customer base. Through lectures, projects and activities, students will be introduced to the principles of personal selling, trusts relationships, customer value, sales professionalism and sales ethics. Strong emphasis is placed on effective sales communication, including interpersonal communication, presentation skills and effective sales dialogue.

SM120: Consumer Psychology

The course materials explain new product roll-out, brand development and preservation, the product life cycle and how to manage it in a sales environment. Strong emphasis is placed on the significance and impact of consumer psychology, including perception, cognitive capacity and brain physiology as it relates to the processing of information. Understanding the foundations of this specialized form of applied psychology is critical to effective marketing and sales programs in contemporary business. Through course lectures and projects student will learn how consumer behavior is measured and interpreted through data analytics.

EXT130: Sales and Marketing Professional Externship

Through direct experiential practical application through an externship, students will be provided the structured opportunity to develop and apply sales and marketing principles to real-world, in-person business enterprise. Seminars and journals will establish a cycle for building competencies and skills that contribute to career objectives.

ADMINISTRATIVE ASSISTANT PROFESSIONAL (AAP)

The skills and aptitudes required for an individual to serve as a professional administrative resource to a business or organization are derived from an array of disciplines and fields, including communication, computer applications and operational sciences. The program affords the student the opportunity to develop and apply the knowledge of business communication and written deliverables, quantitative analysis using information technology, document organization and archiving, and office dynamics and practices. The AAP Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students receive a certificate of completion.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

REQUIRED COURSES FOR COMPLETION

Course ID	Course Title	Lecture (A)	Lab (B)	Externship (C)	Total Contact Hours (A+B+C)	Quarter Credit Hours
CA117	Microsoft Word	110	20	0	130	12
CA127	Microsoft Excel	110	20	0	130	12
BO110	Office Procedures	120	0	0	120	12
BM100	Business Communications	120	0	0	120	12
	PROGRAM TOTALS	460	40	0	500	48

ADDITIONAL OPTIONAL COURSES FOR UP TO 9 MAXIMUM CREDITS

Course ID	Course Title	Lecture (A)	Lab (B)	Externship (C)	Total Contact Hours (A+B+C)	Quarter Credit Hours
*EXT Fall	Administrative Assistant Professional Externship	6	0	84	90	3
*EXT Winter	Administrative Assistant Professional Externship	6	0	84	90	3
*EXT Spring	Administrative Assistant Professional Externship	6	0	84	90	3
*EXT Summer	Administrative Assistant Professional Externship	6	0	84	90	3

Additional Information

Training Methods	Lectures/Labs/Externship Activities
Program Length	4 Quarters or 44 academic weeks, which include 40 academic weeks and four administrative weeks.
Contact Hours	500 contact hours without Externship and up to 770 contact hours with Externship taken in 3 academic quarters for course credit
Quarter Credit Hours	48 quarter credit hours with maximum of 57 quarter credit hours with externship

Externship

* Externship is optional for credit. It allows students to gain work experience in the field of study while earning academic credits. To participate in the externship course, a student **must** earn 12 credits in their first quarter in the program. Externship can be taken a maximum of three times for academic credit during program. A student can earn up to 9 academic credits from externship.

BM100: Business Communications

Through lectures and projects, the course introduces students to the importance of good writing and communication skills in the digital era, how effective communication is derived from critical thinking skills, and how effective organizational communication is built upon articulate leadership and interpersonal communication skills, including public speaking, correspondence, emails and other on-line venues. The course provides guidance in developing business correspondence, digital content, presentations, reports, proposals and business plans.

BO110: Office Procedures

Managing the recurring logistics of office operations in a professional setting requires strong awareness and understanding of the tools, resources, ethics, culture and personalities.

Through lecture, discussion and projects, the student will encounter the theoretical and structural basis for effective administrative support of a business enterprise. Skills emphasized include telephone etiquette, writing memos, letters and reports, scheduling, and petty cash stewardship. Strong emphasis is placed on records retention, management and compliance through use of digital archiving resources and best practices.

CA117: Microsoft Word

Reflecting the importance of creating and manipulating business documents in a professional administrative role, the course immerses student in skill development necessary to competently support word processing demands of business enterprises. Emphasis is placed on secure document creation, modification, editing, formatting, graphics and tables insertion through lectures and labs. Includes skill development in page layout and design, mail merge functions, templates, collaborations, cross references and encryptions.

CA127 Microsoft Excel

The modern electronic spreadsheet is a primary tool for business collection, retention, management and analysis of data, including numerical information text and graphics. The information technology application also serves as a strong resource for database development and application. Students will develop skills to navigate Microsoft Excel for a business setting, including formatting data and text, performing calculations with formulas and functions, and charting/analyzing financial information. Strong emphasis is placed on creating reports and analytical information.

EXT110: Administrative Assistant Professional Externship

Through direct experiential practical application, students will be provided the structured opportunity to develop business communication skills, word processing competence, spreadsheet mastery, office procedures and practices. Seminars and journals will establish the cycle for building competencies and skills that contribute to career objectives.

BUSINESS CAREER PROGRAM (BCP)

The Business Career Program offers students immersion in material that is substantive, thought-provoking and comprehensive regarding the development and operation of a business in the United States. This program places a strong emphasis on business fundamentals including finance, budgeting, strategic planning, sales and marketing, ethics, on-line commerce and information technology resources. Additionally, students will gain knowledge in the areas of professional development and customer service. The BCP Program prepares students for a wide variety of careers as well as further study in higher education. Upon successful completion of the program, students will receive a certificate of completion.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

REQUIRED COURSES FOR COMPLETION

Course ID	Course Title	Lecture Hours (A)	Lab (B)	Total Contact Hours (A+B+C)	Quarter Credit Hours
BM112	Customer Service	30	0	30	3
BM121	Computerized Accounting	50	20	70	6
BM133	Introduction to Small Business Management	60	0	60	6
BM141	Principles of Sales and Marketing	60	0	60	6
BM151	Financial Services	60	0	60	6
BM161	Applied Business Concepts	50	20	70	6
CA113	Computer Applications I	50	20	70	6
CA123	Computer Applications II	50	20	70	6
SS102	Professional Development	30	0	30	3
Program Totals		440	80	520	48

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Program Length in weeks	40 weeks
Contact Hours	520 Contact Hours
Program Length in Quarter Credit Hours	48 quarter credits
Business Career Program Prepares for the following industry certifications:	Microsoft Office Specialist Word, Microsoft Office Specialist Excel

BM112: Customer Service

Students will encounter and be able to identify theories, principles, strategies, initiatives and resources to establish and maintain successful customer relationships in a business setting. Through lecture, discussions, and projects, students will learn skills on how to collect and analyze customer relationship data. Students will review the psychological basis for effective human relationships, as well as theories and models of successful customer relationship management in contemporary business settings. Emphasis on models of excellent customer service, resolving customer issues and complaints, and building a trust relationship.

BM121: Computerized Accounting

Tracking and recording the financial transactions, assets, liabilities and cash flow position of a contemporary business is an information-intensive enterprise that requires powerful technology resources, sophisticated routines and professional accounting team members. Through lectures, discussions, and projects, students will become immersed in the purpose, structure and navigation of accounting software as a means for absorbing information applied to computer-based financial accounting. Emphasis is on types of accounts and accounting entries, accounting reports and statements, entries to the journal and general ledger, the accounting cycle and recording and reviewing transactions with banks and financial institutions.

BM133: Introduction to Small Business Management

The course introduces students to information about how small businesses are created, contrasting with the formation of large corporate enterprises. Through lecture, discussion and projects, student will gain insight regarding where small business opportunities arise, how to harness creativity and initiative through professional disciplines to achieve commercial success. Strong emphasis is placed on developing a viable business plan and adopting a flexible, strategic approach.

BM141: Principles of Sales and Marketing

Through lectures, discussions and projects, students will be introduced to information and research about consumer attitudes, how to measure the changes in preferences through applied data analysis, and improve the firm's knowledge of customer behavior. The concepts are applied through review of social and mobile marketing, market segmentation and target marketing strategies. Student will also encounter discussions on marketing ethics, pricing, supply chain management and promotional activities including advertising, sales and public relations.

BM151: Financial Services

Through lecture, discussions, and projects, students will be introduced to practical application of financial services principles, concepts and models. Core competencies will be developed in banking, taxes, acquisition of debt and other forms of capital formation, interest rates, securing credit and protecting against identity theft.

BM161: Applied Business Concepts

Through lectures, discussions, and projects, students will be immersed in an array of models and theories that facilitate effective application of information technology to strategic planning, market analysis, promotional and sales operations. Emphasis is placed on search engine optimization and web site improvement. Students will gain perspective on ethics and best practices of marketing on-line, identifying compliance issues, and a review of security and protection of intellectual property.

CA113 Computer Applications I

The course immerses students in Microsoft Word computer software, developing skills in document creation, formatting, style, editing and graphic enhancements. Rudimentary word processing outcomes include letters, reports, and research papers with footnoted references, form letters and mailing labels. Resume development and production is emphasized.

CA123 Computer Applications II

Strong emphasis is placed on creating reports and analytical information in format to inform management deliberations and decisions. Particular attention is paid to creating, sorting and making inquiries to the database function of Excel. Student will develop skills to manipulate Microsoft Excel for business, including establishing a complex, multi-page spread sheet, formatting data and text, performing calculations with formulas and functions, and charting/analyzing financial information.

SS102: Professional Development

This course emphasizes the material that will have direct immediate benefit to students seeking further academic studies at a higher level as well as professional employment. Topics include time management, communication, motivation, and leadership and negotiation skills. Provides hands-on support with resume development and effective interview techniques. The course will also introduce students to note-taking and test-taking skills, professional writing, self-assessment, memorization, organization, culture and diversity, and managing and maintaining physical and mental health.

BUSINESS CAREER PROGRAM - DIGITAL MULTIMEDIA CONCENTRATION

The Digital Multimedia Concentration places a strong emphasis on graphic design, webpage design, cascading style sheets (CSS), image processing, web content creation, search engine optimization (SEO) and social media optimization (SMO). By focusing on digital multimedia, students will learn the hands-on skills required to build and promote websites. Additionally, students will acquire the business skills necessary to grow and promote products and services effectively on and off line. Upon successful completion of the program, students will receive a certificate of completion.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

REQUIRED COURSES FOR COMPLETION

Course ID	Course Title	Lecture Hours (A)	Lab (B)	Total Contact Hours (A + B)	Quarter Credit Hours
DM110	Graphic Design	50	20	70	6
DM120	Webpage Markup I	50	20	70	6
DM121	Webpage Markup II	50	20	70	6
DM130	Webpage Styling	50	20	70	6
DM140	Image Processing I	50	20	70	6
DM141	Image Processing II	50	20	70	6
DM150	Web Content Management	60	0	60	6
DM160	Search Engine Optimization and Social Media Optimization	60	0	60	6
Program Totals		420	120	540	48

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Program Length in weeks	40 weeks
Contact Hours	540 Contact Hours
Program Length in Quarter Credit Hours	48 quarter credits

DM110 Graphic Design

The course explores the creation and modification of graphical assets for the internet. Covered topics include: graphic design concepts, types of graphical assets, tools for image processing, material design concepts, and vector and bitmap graphics. Students will learn about different types of graphical assets and different approaches to process images and icons. Exploration of the tools available for processing graphics will allow them to select the right software for any task.

DM120 Webpage Markup I

The course explores webpage design using HTML. Covered topics include: anatomy of a webpage, webpage accessibility, marking up text, and adding links to webpages. Students will be using Adobe DreamWeaver to complete simple webpage design projects.

DM121 Webpage Markup II

The course explores webpage design using HTML. Covered topics include: adding images to webpages, utilizing tables, and creating webpage forms. Students will be using Adobe DreamWeaver to complete simple webpage design projects.

DM130 Webpage Styling

The course introduces students to using CSS for webpage design. Topics covered include: cascading style sheets orientation, formatting text, changing backgrounds, basic box properties, floating and positioning, as well as page layout and animations. Students will use Adobe Dreamweaver to complete simple webpage design projects.

DM140 Image Processing I

The course explores doctoring and creation of images using Adobe Photoshop. Covered topics include: Photoshop Basics, layers, selections, color techniques, text and image functions, painting tools, and special layer functions.

DM141 Image Processing II

The course explores doctoring and creation of images using Adobe Photoshop. Covered topics include: special effects and filters, selections, color adjustments, clipping masks, paths, and shapes, as well as annotation and automation of images.

DM150 Web Content Management

The course introduces students to the creation of content for the web. The content covered includes text for websites, as well as blogs, webinars, videos, podcasts, and photographs. Through analysis of successful strategies as well as a look at real-world case studies, students will be able to create successful content for the web.

DM160 SEO and SMO

The course focuses on Search Engine Optimization and Social Media Optimization. Students will learn about SEO methodologies related to on-page and off-page optimization, user experience, SEO web design, content ranking factors, best practices, and common mistakes in webpage architecture. SMO will give students knowledge on how to increase sales, brand awareness and run promotion campaigns online through the use of popular social networks.

Healthcare Programs

HEALTHCARE CAREER PROGRAM (HCP)

There is high demand for qualified professionals in the healthcare industry. This program prepares the student to function as part of the healthcare team, and to contribute to clinical, administrative medical office operations in providing patient care. This program will teach the aspects of medical assisting that can be applied in the healthcare setting whether in a hospital, clinic or medical office. The fundamental competencies of front-office operations and patient relations as well as the enhanced study of immunology, pharmacology, phlebotomy, medical law, regulations and ethics are covered in-depth. Upon successful completion of the program, students will receive a certificate of completion. Graduates of this program track are eligible to sit for Phlebotomy Technician Certification, EKG Technician Certification; students may take either the Certified Clinical Medical Assistant Exam for CCMA Certification. The HCP Program prepares students for a wide variety of careers as well as further study in higher education.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

Billing and Coding Elective Track

The administrative track of the Healthcare Career Program focuses on the information needs of the healthcare industry. Students are prepared with the knowledge and the skills necessary to provide medical coding and billing, manage healthcare data used to support patient care, and contribute to the development of computer-based patient records.

Graduates of the program are eligible to sit for the national accreditation examination for the NHA Certified Billing and Coding Specialist (CBCS), the NHA Certified Electronic Health Records Specialist (CEHRS), and the AHIMA Certified Coder Associate (CCA). Upon successful completion, graduates will possess the skills necessary for entry-level employment. Presently, opportunities for employment are found in numerous areas including doctor offices, hospitals, pharmaceutical companies, mental health facilities, home-health companies, long-term care facilities, veterinary medicine businesses, insurance companies, law firms, private industry, and colleges and universities.

Medical Assisting Elective Track

The clinical track of the Healthcare Career Program focuses on the skills necessary to assist physicians and patients in various healthcare settings. These skills include communicating with patients, taking vital signs, using appropriate examination room procedure, and interpreting test results. The program also teaches the administrative skills essential for running a medical office. Students are trained to interact directly with patients and caregivers, while learning the skills necessary to provide them with administrative skills, the ability to conduct laboratory work, and administer clinical care.

Graduates of this program track are eligible to sit for Phlebotomy Technician Certification, EKG Technician Certification; students may take either the Certified Clinical Medical Assistant Exam for CCMA Certification or the Registered Medical Assistant Exam for RMA* Certification.

*Clinical students must complete a 160-hour post-graduate externship within 90 days of graduation to be eligible to apply for the RMA certification exam.

Graduates will possess the skills necessary for entry-level employment. Presently, opportunities for employment are found in numerous areas including hospitals, clinics, physicians' offices, home health agencies and long-term care facilities.

Career Development for graduates includes advice on writing resumes and cover letters, managing the interview process, and networking for success.

Students in this program are required to enroll in the core courses listed in the table below; **and**, in addition, must choose between billing and coding elective track courses **or** medical assisting elective track courses.

Course ID	Course Title	Lecture (A)	Lab (B)	Out of Class Hours (C)	Total Hours (A+B+C)	Quarter Credit Hours
BM112	Customer Service	5	40	11.25	56.25	2.25
SS102	Professional Development	5	40	11.25	56.25	2.25
HC121	Medical Administrative Procedures	10	80	22.5	112.50	4.5
HT111	Medical Terminology, Anatomy, and Physiology	10	80	22.5	112.50	4.5
HC131	Foundations of Clinical Procedures	10	80	22.5	112.50	4.5
HC141	Lab Procedures and Phlebotomy	10	80	22.5	112.50	4.5
HC151	Advanced Clinical Procedures	10	80	22.5	112.50	4.5
HC161	Medical Law, Ethics and Patient Relations	10	80	22.5	112.50	4.5
HC171	Medical Billing and Coding	10	80	22.5	112.50	4.5
PROGRAM TOTALS		80	640	180	900	36

Medical Assisting Elective Track

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Program Length in weeks	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Contact Hours	40 Academic Weeks, 4 Administrative Weeks
Program Length in Quarter Credit Hours	900 (480 Lecture Hours, 240 Lab Hours and 180 Out-of-Class Clock Hours)
Healthcare Career Program Prepares for the following industry certifications:	Medical Assisting Electives: Phlebotomy Technician Certification, EKG Technician Certification; students may take either the Certified Clinical Medical Assistant Exam for CCMA Certification or the Registered Medical Assistant Exam for RMA* Certification

BM112: Customer Service

Students will encounter and be able to identify theories, principles, strategies, initiatives and resources to establish and maintain successful customer relationships in a business setting. Through lecture, discussions, and projects, students will learn skills on how to collect and analyze customer relationship data. Students will review the psychological basis for effective human relationships, as well as theories and models of successful customer relationship management in contemporary business settings. Emphasis on models of good customer service, resolving customer issues and complaints, and building a trust relationship.

SS102: Professional Development

This course emphasizes material that will directly benefit students seeking professional employment,

teaching skills of time management, communication, motivation, leadership and negotiation skills. Provides hands-on approach to resume development and effective interview techniques.

HC121: Medical Administrative Procedures

This course focuses on healthcare operations, the fundamental use and components of the electronic health record to better serve patient's needs as well as comply with regulations and protect the proprietary interests of the medical practice. The student will learn about the resources and practices applied to front-office administrative functions through lectures, hands-on lab application and e-learning activities. This course develops competencies in managing office resources, supplies and equipment; medical records management; security; legal requirements; telephone courtesy and effectiveness.

HT111: Medical Terminology, Anatomy, and Physiology

This course of study focuses on the need for effective and accurate communications in the healthcare environment and the patient provider relationship. Areas of study will be anatomy and physiology, technical medical terminology, specialized office vocabulary and abbreviations. The student will acquire skills, through lecture, discussions, and projects, and e-learning activities.

HC131: Foundations of Clinical Procedures

In this course, students will learn the fundamental theories and practices of patient care, infection control, performing examinations and general operations of a healthcare facility. The student will learn through research, lecture/cases studies, discussions, and projects about the various medical specialties with specific focus on reproductive, urinary, pediatric and geriatric cases. The student will learn through hands on practical lab application; patient interview skills during the intake process, how to check and record vital signs and recording patient medical history.

HC141: Lab Procedures and Phlebotomy

This course teaches the students the fundamental competencies and step by step laboratory procedures of specimen collection and analysis of biological specimens. The student will learn the key role played by the medical assistant in the collection, labeling, and preservation and processing of those specimens through laboratory protocols. The student will learn through lecture/cases studies, discussions, and projects how to effectively collect and process blood, urine and stool specimens.

HC151: Advanced Clinical Procedures

This class builds upon competencies and skills learned in HC141. This course of study focuses on providing higher level medical care and the administration functions of the medical assistant in a healthcare facility. The student will learn through research, lecture/cases studies, discussions, and projects the competencies in assisting with minor surgery, electrocardiography, and pulmonary functions with an emphasis on knowledge of pharmacology. Other competencies developed include accurate, dosage calculations and the administration of medications through oral and parenteral methods.

HC161: Medical Law, Ethics and Patient Relations

This course will teach the student the importance of biomedical ethics issues as well as gain familiarity with federal laws that mandate the protection and safe keeping of patient records (HIPAA: Health Insurance Portability and Accountability Act).

HC171: Medical Billing and Coding

This course provides an insight into the medical billing and coding services in healthcare, with the opportunity to demonstrate the skills and competencies that have been taught by the four prerequisite courses. The student will learn through lecture/cases studies, discussions, and projects the billing and coding policies applied in a clinical setting, submitting requests for prior authorization, finding and applying codes found in the ICD and CPT, billing and collections procedures, contracts, and identify resources available through the Healthcare Common Procedure Coding System HCPCS coding manual.

Course ID	Course Title	Lecture (A)	Lab (B)	Out of Class Hours (C)	Total Hours (A+B+C)	Quarter Credit Hours
BM112	Customer Service	5	40	11.25	56.25	2.25
SS102	Professional Development	5	40	11.25	56.25	2.25
HC121	Medical Administrative Procedures	10	80	22.5	112.50	4.5
HT111	Medical Terminology, Anatomy, and Physiology	10	80	22.5	112.50	4.5

Billing and Coding Elective Track

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Program Length in weeks	40 Academic Weeks, 4 Administrative Weeks
Contact Hours	900 (480 Lecture Hours, 240 Lab Hours and 180 Out-of-Class Clock Hours)
Program Length in Quarter Credit Hours	36 quarter credits
Healthcare Career Program Prepares for the following industry certifications:	Billing and Coding Electives: NHA Billing and Coding Specialist Exam for CBCS Certification, NHA Electronic Health Records Specialist Exam for CEHRS Certification and AHIMA's Certified Coding Associate Exam for CCA Certification

* Students who choose Medical Assisting Electives must complete a 160-hour post-graduate externship within 90 days of graduation to be eligible to apply for the RMA certification exam.

BM112: Customer Service

Students will encounter and be able to identify theories, principles, strategies, initiatives and resources to establish and maintain successful customer relationships in a business setting. Through lecture, discussions, and projects, students will learn skills on how to collect and analyze customer relationship data. Students will review the psychological basis for effective human relationships, as well as theories and models of successful customer relationship management in contemporary business settings. Emphasis on models of good customer service, resolving customer issues and complaints, and building a trust relationship.

SS102: Professional Development

This course emphasizes material that will directly benefit students seeking professional employment, teaching skills of time management, communication, motivation, leadership and negotiation skills. Provides hands-on approach to resume development and effective interview techniques.

HC121: Medical Administrative Procedures

This course focuses on healthcare operations, the fundamental use and components of the electronic health record to better serve patient's needs as well as comply with regulations and protect the proprietary interests of the medical practice. The student will learn about the resources and practices applied to front-office administrative functions through lectures, hands-on lab application and e-learning activities. This course develops competencies in managing office resources, supplies and equipment; medical records management; security; legal requirements; telephone courtesy and effectiveness.

HT111: Medical Terminology, Anatomy, and Physiology

This course of study focuses on the need for effective and accurate communications in the healthcare environment and the patient provider relationship. Areas of study will be anatomy and physiology, technical medical terminology, specialized office vocabulary and abbreviations. The student will acquire skills, through lecture, discussions, and projects, and e-learning activities.

HT133: Foundations of ICD-10

This course focuses on developing the students understanding of the competencies required in coding medical diagnoses, creating abstracts of practitioner notes, ICD -10-CM, ICD-10-PCS, and Z-Codes. The student will also learn about the billing and coding process, its recurring cycles and expectations for achieving accurate and timely reimbursements. The student will these learn and demonstrate these skills, through lecture/cases studies, discussions, and projects.

HT143: Advanced ICD-10

In this class students will build on their knowledge and skills derived from HT133, to understand and apply the competencies in ICD -10-CM and ICD-10-PCS billing and coding processes; and written guidelines utilizing proper code sequencing and coding for all 21 chapters of ICD reference. The student will learn and demonstrate these skills, through lecture/cases studies, discussions, and projects.

HT151: Foundations of CPT

This course presents the foundation of a professional healthcare billing and coding operation and discusses the knowledge and mastery of the Current Procedural Terminology (CPT) manual and its applications to the accurate and timely submission of documentation to support reimbursement for healthcare activities. The student will become familiar in the theory, structure and organization of the CPT and its sections, symbols, modifiers and guidelines. The students will learn to demonstrate competence in marking codes and accurately completing a CMS 1500 insurance reimbursement document. This will be done through lecture/case studies, discussions, and projects.

HT162: Advanced CPT

This course uses the foundational knowledge gained from HT 151, to apply the student's new skills of researching and locating on-line, step-by-step resources to improve their billing and coding accuracy and speed. The student will learn and demonstrate these skills, through lecture / cases studies, discussions, and projects Students will gain a familiarization and understanding of the various anatomical systems, how to evaluate as well as interpret a medical diagnosis and how to apply it to the billing and coding process.

HT171: Medical Insurance Methodology

This course teaches the methodology of the billing and claims systems and the roles that patients, healthcare providers, insurance providers and government agencies play in healthcare claim reimbursement, requirements, outcomes and concerns regarding fraud and abuse.

PHLEBOTOMY TECHNICIAN PROGRAM (PHLTEC)

The Phlebotomy Technician Program provides students the knowledge and skills necessary to assist in performing phlebotomy procedures. This course also introduces the proper techniques of handling and processing blood fluid and specimens, utilizing current OSHA and CLIA guidelines, with an emphasis on universal precautions, sanitation and sterilization methods related to the medical office environment and procedures. Topics include medical terminology and anatomy and physiology related to phlebotomy, syringe method, butterfly method and evacuated tube method of venipuncture, different needle types, hematology, basic blood testing, laboratory equipment, and specimen collecting and testing, including waived laboratory procedures. The PHLTEC Program prepares students for a wide variety of careers as well as further study in higher education.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

Course ID	Course Title	Lecture (A)	Lab (B)	Outside of Class Work (C)	Total Contact Hours (A+B+C)	Quarter Credit Hours
HC146	Phlebotomy Technician	10	110	60	180	0
PROGRAM TOTALS		10	110	60	180	0

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities
Program Length in weeks	8 weeks
Contact Hours	180 (120 In-Class Contact Hours, 60 Out of Class Contact Hours)
Program Length in Quarter Credit Hours	Non-credit course
The Phlebotomy Technician Program Prepares for the following industry certification:	Phlebotomy Technician Certification (CPT) through NHA

Computer Technology Programs

CS FOUNDATION

The CS Foundation program is designed to prepare students for entry-level employment in the field of computer science. The program focuses on software testing (both manual and automated) as well as program design. The program introduces students to the Java Programming language, equipping them with the basic software development, debugging, and testing tools. Upon successful completion of this program, students will be eligible to sit for the International Software Testing Qualification Board (ISTQB) certification examination (foundation level). The CS Foundation Program prepares students for a wide variety of careers as well as further study in higher education.

Additional Information

Training Methods	Lectures/Labs/Externship Activities
Program Length in weeks	37 academic weeks
Contact Hours	698 contact hours
Program Length in Quarter Credit Hours	36 quarter credit hours

Practicum

Practicum is an integral part of the education process for this program and is required.

CSC201 Components of Computer Systems

Lecture Clock Hours: 10; Lab Hours: 20

Total Clock Hours: 30; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

This course examines the hardware components of a computer system by addressing memory, the central processing unit, input and output devices, auxiliary storage devices, and communications devices.

Additional emphasis is placed on application software, system software, database management systems and other types of systems, programming languages, how systems are analyzed and designed, security, ethics, and privacy issues.

CSC209 Mathematical Foundations of Computing

Lecture Clock Hours: 10; Lab Hours: 20

Total Clock Hours: 30; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

This course gives a description of the fundamental mathematical concepts used by computer scientists and provides an introduction to the "discrete" part of mathematics. The topics covered in this course include propositional logic, logical argument, an introduction to proof techniques, basics of set theory, functions and matrices, elementary number theory, combinatorial enumeration, discrete probability, and graph theory, with a view toward applications. The purpose of this course is to develop knowledge and skills in fundamental mathematical topics that are relevant to computing.

CSC211 Program Design

Lecture Clock Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course is designed to help students develop good programming skills for solving common business problems. Emphasis is placed on structured programming and modular design. Pseudo code is used as the major program design technique. The course objectives prepare students to take International Software Testing Qualification Board (ISTQB) foundation certification examinations.

CSC212 User Interface Design and Programming

Lecture Clock Hours: 30; Lab Hours: 40

Total Clock Hours: 70; Quarter Credit Hours: 5

Prerequisites: Must meet program admissions requirements

The objective of this course is to provide students with a basic knowledge of the theoretical foundations of human computer interaction and an appreciation for human factors in software systems. Students will practice designing user-centered interfaces. HTML, CSS and JavaScript are the languages used to build and style websites. In this course students will learn the basics of HTML, CSS and JavaScript, and then review some of the current HTML5 and CSS3 best practices.

CSC213 Programming Practicum

Practicum Hours: 284

Total Clock Hours: 284; Quarter Credit Hours: 9

Prerequisites: CSC211, CSC214

Co-requisites: Must be enrolled in the CS Foundation Program

This course reinforces program design and Java programming skills while providing students with real-world experience facilitated at a practicum site. Students will work with in-field professionals and be evaluated on skills learned on these sites. Emphasis is placed on developing skills that enable CSI graduates to find and succeed at entry-level employment in a technical environment.

CSC214 Introduction to Java Programming

Lecture Clock Hours: 30; Lab Hours: 64

Total Clock Hours: 94; Quarter Credit Hours: 6

Prerequisites: CSC211 Program Design

This course is an introduction to using Java programming language. Students will learn the fundamentals of Java and focus on understanding the fundamental concepts of the object-oriented paradigm and its implementation into the Java Programming language. Emphasis is placed on learning the Java language and its run-time and development environments; learning how to use the Application Programming Interface (API); writing and maintaining Java applications; creating, running, and debugging Java programs; controlling program flow with conditions and loops; and developing high quality, working software that solves real problems.

CSC215 – Manual Testing

Lecture Clock Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course is designed to detail each level of software testing and the associated specific testing methodologies that apply. Emphasis is placed on specific techniques for each level of testing (unit, integration, system, performance, and Internet) as well as a description of possible tool environments. Additional topics include how to handle the fixes for issues found during software testing. The course objectives prepare students to take International Software Testing Qualification Board (ISTQB) foundation certification examinations.

CSC216 Test Automation

Lecture Clock Hours: 10; Lab Hours: 20

Total Clock Hours: 30; Quarter Credit Hours: 2

Prerequisites: CSC211, CSC214, CSC215

This course is designed to provide detailed ideas about test automation and technical issues that appear during test automation adoption in real-life projects. Emphasis is placed on technical issues accompanied with exercises that help students to start implementing test automation and associated development activities into real projects. The course objectives prepare students to take International Software Testing Qualification Board (ISTQB) foundation certification examinations.

CSC217 IT Quality Assurance and Certifications

Lecture Hours: 10; Lab Hours: 20;

Total Clock Hours: 30; Quarter Credit Hours: 2

Prerequisites: CSC211, CSC214, CSC215, CSC216

This course is designed to introduce frameworks, solutions details, and the IT standards conceptual model through insightful case studies that illustrate factors affecting the performance of business processes. By teaching students how to enhance process performance through IT standardization, this course demonstrates the effectiveness of IT standards and the applicable techniques for implementation and management of such practices. Additional information regarding relevant IT certifications and their impact on professional growth and development is provided.

ENG201 Electric and Electronic Circuits

Lecture Clock Hours: 10; Lab Hours: 20

Total Clock Hours: 30; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

The main goal of this course is to provide the students with a clear and logical presentation of the basic concepts and principles of electricity and magnetism in physics, and to strengthen an understanding of the concepts and principles through a broad range of interesting applications to the real world.

CS ESSENTIAL

The CS Essential program introduces students to a working knowledge of programming basics, problem solving, algorithm development, debugging strategies, and a modern programming environment. Students will also acquire skills that can be applied to a problem solving using programs and the practice of computer science. Students will study specialized subjects such as machine organization, computer design, data structures, and programming languages. The curriculum introduces students to programming languages and prepares them to take the OCJP and Java ME certifications. The CS Essential Program prepares students for a wide variety of careers as well as further study in higher education.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

Additional Information

Training Methods	Lectures/Labs/Externship Activities
Program Length	40 academic weeks
Contact Hours	695 contact hours
Quarter Credit Hours	36 quarter credit hours

Practicum

Practicum is an integral part of the education process for this program and is required.

CSC200 Internet and IT Legal Issues

Lecture Hours: 5; Lab Hours: 20

Total Clock Hours: 25; Quarter Credit Hours: 1.5

Prerequisites: Must meet program admissions requirements

This course presents the range of legal issues arising from the emergence of cyberspace. The course considers how the law has reacted to challenges posed by the Internet as well as how the law is shaping its future. Specific areas covered include jurisdictional analysis, First Amendment/free speech, digital copyrights, trademarks and domain names, electronic privacy, e-commerce, and Internet governance.

CSC205 Operating Systems Concepts and Design

Lecture Hours: 5; Lab Hours: 30

Total Clock Hours: 35; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

This course covers principles of operating systems. Effective management of machine resources is emphasized, including resource allocation and scheduling, mutual exclusion, deadlock avoidance, memory management policies, devices and file systems, client-server systems, virtualization.

CSC208 Machine Organization

Lecture Hours: 5; Lab Hours: 30

Total Clock Hours: 35; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

This course describes the internal structure (architecture) of computers and the interface between computers and the programs, using one example each from large mainframes, medium-sized minicomputers, and small microcomputers.

CSC210 Computer Design

Lecture Hours: 5; Lab Hours: 20

Total Clock Hours: 25; Quarter Credit Hours: 1.5

Prerequisites: Must meet program admissions requirements

This course aims to provide an understanding of the different ways computers can be analyzed and designed, starting with the basic logic elements. The issues and techniques covered in this course are relevant to the design of all computers, regardless of their particular architecture.

CSC219 Languages and Automation

Lecture Hours: 5; Lab Hours: 30

Total Clock Hours: 35; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

Written to address the fundamentals of formal languages, automata, and computability, this course familiarize students with the foundations and principles of computer science and to strengthen the students' ability to carry out formal and rigorous mathematical arguments.

CSC220 Programming Languages (Java, C, C++)

Lecture Hours: 10; Lab Hours: 60

Total Clock Hours: 70; Quarter Credit Hours: 4

Prerequisites: Must meet program admissions requirements

This course provides students with a comprehensive study of the Java and C++ Programming Languages. The course stresses the object paradigm including classes, inheritance, virtual functions, and templates in the development of Java and C++ programs. Lab exercises reinforce the lectures.

CSC221 Java Programming

Lecture Hours: 10; Lab Hours: 80

Total Clock Hours: 90; Quarter Credit Hours: 5

Prerequisites: CSC220

This course teaches students how to develop Java applications. Topics covered include the Java programming language syntax, OO programming using Java, exception handling, file input/output, threads, collection classes, and networking. Students will develop and test Java applications (typically) using

NetBeans. This course is a foundation to all Application Server courses, and special Java Technology courses such as Struts, Spring, and Hibernate.

CSC223 Java Programming Practicum

Lecture Hours: 6; Lab Hours: 0; Externship Hours: 144

Total Clock Hours: 150; Quarter Credit Hours: 5

Prerequisites: CSC210, CSC225, CSC219, CSC230, CSC220, CSC208

Co-requisites: Must be enrolled in the CS Essential Program.

Externship experience provides students the opportunity to apply and integrate knowledge acquired through coursework. In clarifying and broadening career goals, the externship experience assists students in discovering, developing, and refining necessary competencies and skills for their proposed career objectives

CSC225 Data Structures

Lecture Hours: 5; Lab Hours: 50

Total Clock Hours: 55; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

For solving algorithmic problems many aspects need to be mastered: efficient ways of storing and manipulating (large amounts of) data, algorithm design techniques, how to establish that an algorithm is correct, and how to analyze the efficiency of an algorithm. In this course, the student will learn the basic skills and knowledge to develop efficient algorithms to solve computational problems and to make informed choices between different solutions for the same problem. These include standard data structures and algorithms for frequently appearing problems.

CSC230 Object-Oriented Programming

Lecture Hours: 5; Lab Hours: 30

Total Clock Hours: 35; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

This course presents a conceptual and practical introduction to imperative and object oriented programming, exemplified by Java. As well as providing grounding in the use of Java, the course will cover general principles of programming in imperative and object oriented frameworks.

CSC240 Mobile Application Development I

Lecture Hours: 10; Lab Hours: 60

Total Clock Hours: 70; Quarter Credit Hours: 4

Prerequisites: Must meet program admissions requirements

This course will introduce the unique requirements and methodologies necessary for developing dedicated and client-server applications that target smartphones, tablet computers, and other mobile devices. The course will address the unique memory, communications, and power requirements of these devices, as well as exploring new hardware capabilities such as location-aware computing and voice, image, and video communications.

CSC241 Mobile Application Development II

Lecture Hours: 10; Lab Hours: 60

Total Clock Hours: 70; Quarter Credit Hours: 4

Prerequisites: CSC240

The purpose of this course is to introduce students the main operating systems of mobile electronics: Android, iOS, Windows Phone, Linux and etc. Students will learn the basis of mobile systems programming: development languages, main libraries, code organization, structure of mobile applications, automation equipment of mobile systems programming, etc. Students will understand the development of program applications of mobile systems for certain OS (Android): life cycle of appendices, the services, used components, design of the user interface, event model, etc.

CS EXPERT

This program offers the most comprehensive studies in the field of computer science. The aim is to train computer science professionals and developers who have a balanced understanding of the field, capable of considering the user, the technological, the environmental, and the societal points of view. Students will study specialized subjects such as computer algorithms, programming language design, mobile operating systems, software engineering, etc. The CS Expert Program prepares students for a wide variety of careers as well as further study in higher education.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

CSC271	Programming Project Development II	5	50	0	55	3
PROGRAM TOTALS		106	480	54	640	36

Additional Information

Training Methods	Blended Learning: Lectures, Lab, Web-Based Learning Activities
Program Length	4 Quarters or 42 instructional weeks excluding scheduled breaks or 52 weeks including scheduled breaks
Clock Hours	756 (420 In-Class Clock Hours and 336 Lab Hours)
Quarter Credit Hours	36

CSC190 IT Security and Safety

Lecture Hours: 20

Total Clock Hours: 20; Quarter Credit Hours: 2

Prerequisites: Must meet program admissions requirements

The goal of this course is to teach students practical techniques that will be used on a daily basis, while also explaining the rationale behind these practices. Students will learn the techniques for how to perform risk assessments for new IT projects, how to efficiently manage daily risk activities, and how to qualify the current risk level for presentation to executive level management.

CSC192 Communication and Ethical Issues in Computing

Lecture Hours: 5; Lab Hours: 50

Total Clock Hours: 55; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course will examine the ethical issues that arise as a result of increasing use of computers, and the responsibilities of those who work with computers, either as computer science professionals or end users. The course will stress the ways in which computers challenge traditional ethical and philosophical concepts, and raise old issues in a new way.

CSC195 Business and Intellectual Property in IT

Lecture Hours: 5; Lab Hours: 50

Total Clock Hours: 55; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course introduces students to Intellectual Property in IT. The course provides an overview of the main principles and legal rules of Intellectual Property Law, focusing specifically on the theoretical and practical connections between Intellectual Property and academic/scientific works/studies and on the Intellectual Property issues with which the students are likely to come into contact in their different areas of knowledge.

CSC250 Computer Algorithms

Lecture Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course focuses on essential information about Algorithms and Data Structures. It provides full coverage of data structures and algorithms for sorting, searching, graph processing, and string processing, including fifty algorithms every programmer should know.

CSC233 Programming Languages Practicum

Lecture Hours: 6; Externship Hours: 54

Total Clock Hours: 60; Quarter Credit Hours: 2

Prerequisites: CSC255

Externship experience provides students the opportunity to apply and integrate knowledge acquired through coursework. In clarifying and broadening career goals, the externship experience assists students in discovering, developing, and refining necessary competencies and skills for their proposed career objectives.

CSC247 Programmable Mobile Systems

Lecture Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: CSC245

This course covers contemporary technologies for programmable mobile devices. Students will get an overview of mobile operating system concepts/techniques and will learn how to develop software for mobile devices, with particular emphasis on the constraints intrinsic to such devices. Topics in location-based services and pervasive computing will also be covered.

CSC250 Computer Algorithms

Lecture Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course focuses on essential information about Algorithms and Data Structures. It provides full coverage of data structures and algorithms for sorting, searching, graph processing, and string processing, including fifty algorithms every programmer should know.

CSC255 Programming Languages Design

Lecture Hours: 10; Lab Hours: 40

Total Clock Hours: 50; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This is an advanced course on principles of programming language design. Major semantic approaches to programming languages will be discussed, such as structural operational semantics (various kinds), denotation semantics, and rewriting logic semantics. Programming language paradigms will be investigated and rigorously defined, including: imperative, functional, object-oriented, and logic programming languages; parameter binding and evaluation strategies; type checking and type inference; concurrency. Major theoretical models will be discussed.

CSC260 Software Engineering I

Lecture Hours: 10; Lab Hours: 60

Total Clock Hours: 70; Quarter Credit Hours: 4

Prerequisites: Must meet program admissions requirements

This course is an introduction to object-oriented software development process and design. Topics include: iterative development, interpretation of requirements and use case documents into code; application of design notation in UML (Unified Modeling Language); and use of commonly-used design patterns. Hands on labs will be used to reinforce concepts taught in the lectures.

CSC261 Software Engineering II

Lecture Hours: 10; Lab Hours: 60

Total Clock Hours: 70; Quarter Credit Hours: 4

Prerequisites: CSC260

This course applies an engineering design process to produce high quality software. Topics include: identifying user requirements; performing problem analysis to produce process oriented documentation; using UML notation to create design models and diagrams; investigating and applying design patterns, project management; configuration management. The focus will be on completing software projects using an object-oriented programming language.

CSC270 Programming Project Development I

Lecture Hours: 5; Lab Hours: 50

Total Clock Hours: 55; Quarter Credit Hours: 3

Prerequisites: Must meet program admissions requirements

This course will introduce the students to the basic elements of project management. Step-by-step processes and techniques will be introduced for the various phases of a project life cycle. Students will be assisted in the development of project planning documents.

CSC271 Programming Project Development II

Lecture Hours: 5; Lab Hours: 50

Total Clock Hours: 55; Quarter Credit Hours: 3

Prerequisites: CSC270

This is a project based course in which students will develop software. The project requires applying programming knowledge and skills learned up to this course according to established design management practices including technical presentations (oral and written) by all students.

NETWORKING CAREER PROGRAM (NCP)

Networking Career Program (NCP)

The Networking Career Program at Computer Systems Institute prepares students for a variety of entry-level careers in computer networking and information technology occupations. The theory and practical experience students gain allows them to develop the skills necessary to remain competitive in today's market. The NCP Program prepares students for a wide variety of careers as well as further study in higher education.

Students who enroll in the Networking Career Program will have the option of choosing one of three Elective tracks:

(1) CompTIA/MICROSOFT or (2) the CompTIA/CISCO or (3) MICROSOFT/CISCO

CompTIA/MICROSOFT Elective Track:

The CompTIA/Microsoft track of the Networking Career Program prepares students for a variety of entry-level careers in computer networking and information technology. The combination of theoretical and practical hands-on experience allows students to gain the skills necessary to become and remain competitive in today's market. This comprehensive program covers a wide range of topics mapped towards CompTIA® exams and to the new generation of Microsoft® Exams.

Instructors provide helpful exam tips, practice questions, and hands-on experience so students become expert hardware and software technicians. In addition to the classroom learning activities, Career Development for graduates include advice on writing resumes and cover letters, managing the interview process, and networking for success.

CompTIA/CISCO Elective Track:

The CompTIA/CISCO track prepares students to sit for the CompTIA A+ and the CISCO CCENT and CCNA exam. The program exposes students to the maintenance of PCs, mobile devices, laptops, operating systems, and printers. Students will have exposure to hardware and software components necessary to maintain and troubleshoot a PC. Students will also gain knowledge and skills necessary to install, operate, and troubleshoot a small enterprise branch network, including basic network security. The curriculum covers networking fundamentals, WAN technologies, basic security and wireless concepts, routing and switching fundamentals, and configuring simple networks. In addition, students will also be exposed to routing and switching which allows students the opportunity to install, configure, operate, and troubleshoot medium-size routed and switched networks.

Instructors provide helpful exam tips, practice questions, and hands-on experience so students become expert hardware and software technicians. In addition to the classroom learning activities, students will have hands-on experience in A+ Lab and ICND-1 in advanced courses. Career Development for graduates include advice on writing resumes and cover letters, managing the interview process, and networking for success.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link:

[Disclosure Table](#)

MICROSOFT/CISCO Elective Track:

The MICROSOFT/CISCO track prepares students to sit for the MICROSOFT 70-680 and 70-685 and the CISCO CCENT and CCNA exams. This program provides students with the knowledge and skills necessary to configure and administer Windows 7 as a standalone installation or in a corporate environment as a part of a Windows Active Directory domain. Students, provided with the ability to create and deploy images, configure hardware and software, configure networking and backup and restore system information. Students will also build upon the knowledge and experiences gained from working with Windows XP and Windows Vista in a corporate environment. Students will also gain knowledge and skills necessary to install, operate, and troubleshoot a small enterprise branch network, including basic network security. The curriculum covers networking fundamentals, WAN technologies, basic security and wireless concepts, routing and switching fundamentals, and configuring simple networks. In addition, students will also be exposed to routing and switching which gives students the opportunity to install, configure, operate, and troubleshoot medium-size routed and switched networks.

Instructors provide helpful exam tips, practice questions, and hands-on experience so students become expert hardware and software technicians. Career Development for graduates include advice on writing resumes and cover letters, managing the interview process, and networking for success.

Additional Information

Training Methods	Lectures/Labs/Web-Based Learning Activities/Out-of-School Work
Program Length in weeks	40 Academic Weeks, 4 Administrative Weeks
Contact Hours	900 (480 Lecture Hours, 240 Lab Hours and 180 Out-of-Class Clock Hours)
Program Length in Quarter Credit Hours	36 quarter credits

BM112: Customer Service

Lecture Hours: 5; Lab Hours: 40; Total Contact Hours: 56.25

Out of School Work Hours: 11.25; Quarter Credit Hours: 2.25

Students will encounter and be able to identify theories, principles, strategies, initiatives and resources to establish and maintain successful customer relationships in a business setting. Through lecture, discussions, and projects, students will learn skills on how to collect and analyze customer relationship data. Students will review the psychological basis for effective human relationships, as well as theories and models of successful customer relationship management in contemporary business settings. Emphasis on models of good customer service, resolving customer issues and complaints, and building a trust relationship.

SS102: Professional Development

Lecture Hours: 5; Lab Hours: 40; Total Contact Hours: 56.25

Out of School Work Hours: 11.25; Quarter Credit Hours: 2.25

This course emphasizes material that will directly benefit students seeking professional employment, teaching skills of time management, communication, motivation, leadership and negotiation skills. Provides hands-on approach to resume development and effective interview techniques.

NA165 Client Operating Systems

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: Must meet program admissions requirements

This course focuses tasks commonly performed by advanced end-users and entry-level IT professionals alike, including: Using features and functions of common operating systems and establishing network connectivity, Identifying common software applications and their purpose and Using security and web browsing best practices.

NA181 Windows Desktop Support I

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: NA165 Client Operating Systems

In this course, students will learn how to support and configure Windows 10 desktops in an organizational environment. Students will develop skills that include learning how to install, customize, and update Windows 10 operating systems. Students will learn how to managing storage, files, and devices as well as how to configure network connectivity for Windows 10. Students will also learn how to secure the Windows 10 OS and protect the data on the device. Finally, students will learn how to manage and troubleshoot Windows 10.

NA191 Windows Desktop Support II

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: NA165 and NA181

In this course, students will learn how to plan and implement an operating system deployment strategy using modern deployment methods. Students will be introduced to key components of modern management and co-management strategies. This course also covers what it takes to incorporate Microsoft Intune into your organization. Students will also learn about methods for deployment and management of apps and browser-based applications. Students will be introduced to the key concepts of security in modern management including authentication, identities, access, and compliance policies. Students will be introduced to technologies such Azure Active Directory, Azure Information Protection and Windows Defender Advanced Threat Protection, as well as how to leverage them to protect devices and data. It is designed to prepare the student for the Microsoft Certified Solution Associate (Microsoft Exam MD-101).

NA210 Interconnecting Networking Devices Part I

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: NA165, NA181 and NA191

Students will gain the knowledge and skills necessary to manage, maintain, troubleshoot, install, operate, and configure basic network infrastructure as well as describe networking technologies, understand basic design principles, adhere to wiring standards, and use testing tools

NA220 Interconnecting Networking Devices Part II

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: NA165, NA181, NA191 and NA220

The training provided will guide you on how to plan, secure, and maintain different types of server equipment you'll encounter as an IT professional. This program also focuses on the characteristics of the MS Server environment and explores a variety of topics including installation procedures, security issues, back-up procedures, and remote access.

NA230 Interconnecting Networking Devices Part III

Lecture Hours: 10; Lab Hours: 80; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Quarter Credit Hours: 4.5

Prerequisites: NA165, NA181, NA191 and NA220

This course provides foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings.

NA240 Interconnecting Networking Devices Part IV

Lecture Hours: 5; Lab Hours: 55; Total Contact Hours: 112.50

Out of School Work Hours: 22.5; Total Web-Based Time: 30 Quarter Credit Hours: 4.5 Prerequisites: NA112, NA122, NA132, NA210, NA220, NA230

You will learn about techniques and methodologies used to successfully configure, execute, construct and troubleshoot network security in order to ensure the threat of viruses, worms, Trojans and improper configuration is minimized or negated.

SOFTWARE DEVELOPMENT SPECIALIST (SDS)

Software development specialists work to create and modify general computer applications and software to provide solutions to various business needs. In this program, develop a solid foundation in Java Programming, architecture and database skills. Upon completion of the diploma program, possess the skills to build stand-alone and client-server applications, including web applications.

Campuses Offering the Communication Program

This program is offered online.

CS120 Software Development Life Cycles

Total Clock Hours: 18

Prerequisites: Must meet program admissions requirements

This course represents the rationalization of modern software engineering methods into a Complex Adaptive System of practices. It leverages Control Systems Engineering theory to explain Agile beyond a tacit and anecdotal basis such that the pace of modern practice adoption can accelerate. Students will develop a common understanding of the essential elements of software engineering and the phases of the SDLC. Acquire knowledge about different SDLC models, and be able to identify the most suitable model for a given project. Students will also develop an understanding and appreciation of the importance of the deliverables of each phase.

CS125 User Interface Design

Total Clock Hours: 40

Prerequisites: Must meet program admissions requirements

In this course students will build an understanding of the concepts in responsive design. Be able to build cross-browser web-pages using HTML techniques and develop skills in creating interactive web-sites using JavaScript. Upon completion students will have the skills to improve a web-page look and feel with CSS.

CS115 RDBMS Concepts and SQL

Total Clock Hours: 60

Prerequisites: Must meet program admissions requirements

The course reviews topics such as conceptual data modelling, relational data model, relational query languages, relational database design and transaction processing and current technologies such as semantic web, parallel and no SQL databases. It exposes the student to the fundamental concepts and techniques in database use and development as well provides a foundation for research in databases.

CS110 Introduction to programming

Total Clock Hours: 90

Prerequisites: Must meet program admissions requirements

This course is an introduction to using Java programming language. Students will learn the fundamentals of Java and focus on understanding the fundamental concepts of the object-oriented paradigm and its implementation into the Java Programming language. Emphasis is placed on learning the Java language and its run-time and development environments; learning how to use the Application Programming Interface (API); writing and maintaining Java applications; creating, running, and debugging Java programs; controlling program flow with conditions and loops; and developing high quality, working software that solves real problems.

Language Programs

BEGINNER ESL*

The Beginner ESL program consists of three courses: Beginner Vocabulary and Conversation, Beginner Writing and Grammar, and Beginner Reading Strategies. Students will master beginner vocabulary, basics of writing, and learn important reading strategies. Upon successful completion of the program, students will gain confidence in speaking English, be able to structure a grammatically correct paragraph, and master some of the reading strategies: previewing, predicting, using word clues, and using visual clues. Through language lab classes, workshops, and lecture classes, students will become comfortable speaking about relatively simple topics with classmates, teachers, and native English speakers.

Campuses Offering the Beginner ESL Program

This program is offered at the Skokie, Chicago, and Lombard campuses.

ESL101 Beginner Vocabulary and Conversation

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is a beginner-level exploration of vocabulary and conversation. Emphasis is placed on building and using new vocabulary, developing listening skills, and exploring spoken English. The course includes vocabulary-building activities with a focus on level-appropriate high-frequency vocabulary. It also incorporates listening and speaking exercises. The course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ESL102 Beginner Writing and Grammar

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an introduction to English grammar and writing conventions. The emphasis is placed on

grammar and sentence structure. The grammar aspect of this course concentrates on usage of appropriate pronouns, articles, modals, and basic tenses. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ESL103 Beginner Reading Strategies

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an introduction to various reading strategies aimed at developing reading and understanding skills in beginner students. The course explores relevant vocabulary and grammar while focusing on analyzing and synthesizing ideas and information. Students will work with a variety of text types and graphic formats and begin to think critically about their reading material. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

INTERMEDIATE ESL*

The Intermediate ESL program consists of three courses: Intermediate Vocabulary and Conversation, Intermediate Writing and Grammar, and Intermediate Reading Strategies. English learners at the intermediate level will build on their existing language skills and focus on preparing themselves for further academic progress. Courses will focus on exploring new vocabulary, academic writing, and reading. Upon successful completion of the program, students will be able to use their newly acquired vocabulary in interactions, write expository paragraphs, and understand grammar concepts including, but not limited to modal and passive verbs, verb structure and conditional sentences.

ESL201 Intermediate Vocabulary and Conversation

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an intermediate-level exploration of vocabulary and conversation. Emphasis is placed on building and using new vocabulary, developing listening skills, and exploring spoken English. The course includes vocabulary-building activities with a focus on level-appropriate, key academic and high-frequency vocabulary, as well as listening and speaking exercises. The course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

SL202 Intermediate Writing and Grammar

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an intermediate-level exploration of English grammar and writing conventions. The emphasis is placed on grammar and sentence structure. The grammar aspect of this course concentrates on usage of correct tenses, adjectives, adverbs, auxiliary verbs, comparatives, and superlatives. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ESL203 Intermediate Reading Strategies

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an intermediate-level course which focuses on various reading strategies aimed at developing reading and understanding skills in intermediate students. The course explores relevant vocabulary and grammar while focusing on analyzing and synthesizing ideas and information. Students will work with a variety of text types and graphic formats and begin to think critically about their reading material. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ADVANCED ESL*

The Advanced ESL program consists of three courses: Advanced Vocabulary and Conversation, Advanced Writing and Grammar, and Advanced Reading Strategies. Students within the advanced level program will learn advanced vocabulary to be able to discuss complex topics. The program focuses on formal and informal American English speech, idiomatic expressions and deriving meaning from detail. Graduates of the Advanced ESL program will be able to effectively outline and write a traditional five-paragraph essay, utilize basic research methods and speak deeply on a wide range of subjects.

ENG412 Discovering Short Stories

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an interactive, literature-based course focused on developing students' vocabulary and grammar and improving their reading, writing, and oral communication skills through analysis of short stories by American writers. Emphasis is placed on interpreting meaning of larger texts, contextual clues regarding vocabulary, literary approaches, and making connections between literature and the real world. Course activities include assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG413 America through Academic Readings

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course immerses students into various readings about American life. The emphasis is placed on increasing students' vocabulary base and gaining readiness for academic assignments. Students explore their values and develop their critical thinking skills by reading, comparing, and discussing stories related to diversity, family, education, government, politics, religion, business, and recreation. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG414 Discovering Fiction

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course focuses on readings by American writers, through exploration of which students develop the knowledge of vocabulary and grammar while improving their reading, oral communication, and writing skills. Grammar exercises are addressed to advanced-level ESL students to help them overcome common trouble areas such as prepositions, articles, and irregular verbs. Students also delve into exploring literary conventions, methods, and devices. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

GENERAL WRITING*

The General Writing program includes three courses: Different Writing Styles, Writing for Work, and Writing Student Newspaper. The program will help students develop the critical thinking skills and writing strategies needed to make clean writing and persuasive arguments. Classes will focus on rhetoric and sentence structure. Upon successful completion of the program, students will gain a variety of appropriate editing skills for a diverse range of professions.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

ENG417 Different Writing Styles

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course focuses on the exploration of rhetoric and sentence structure. It uses a step-by-step approach starting from paragraph writing and finishing with essay writing techniques. Students are introduced to writing styles while emphasis is placed on sentence structure starting with simple sentences and progressing through compound and complex sentences. The writing process and punctuation usage is also covered. The course has an advanced grammar component. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG418 Writing for Work

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is an advanced-level writing course that focuses on workplace and technical communication.

Emphasis is placed on appropriate editing skills for a diverse range of professions. Additionally, students are required to study various types of discourse found in professional writing situations in order to prepare them for writing in their professional lives. Examples of writing from workplace professionals are analyzed and used as models to demonstrate the transition from academic to professional writing. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG419 Writing Student Newspaper

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course is designed to cover a variety of writing styles, research processes and interview practices.

Students will create a college newspaper with their classmates and be responsible for interviewing, writing, and editing all content from start to finish. Emphasis is placed on writing techniques, grammar, and the language skills necessary to produce a newspaper article, as well as newspaper writing methods, styles, and conventions. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

COMMUNICATION*

The Communication Program consists of three courses: The Art of Storytelling, Small Group Discussion, and Interpersonal Communication. The program emphasizes student participation, interviews and oral presentations, which supplement the learning of organizational problem solving, decision-making, leadership and the establishment of healthy interpersonal relationships. Upon successful completion of the program, students learn how to speak easily in front of the class, in a small group, and one-on-one with other students.

For more information about this program enrollment statistics, completion and placement rates, the median debt of students who completed the program, and other information, please use the following link: [Disclosure Table](#)

ENG420 The Art of Storytelling

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course focuses on reading, re-telling, and writing folk tales, fables, and myths. Students will be able to focus on fine-tuning their rhetoric skills and participate in culturally-immersive activities as they discover the world of folk-tales. The students are required to discuss a variety of storytelling styles and approaches and to learn stories by listening and interviewing class storytellers via video and audio recordings. Emphasis is placed on reading, re-telling, and writing techniques used in folk tales, fables, and myths. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG421 Small Group Discussion

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course introduces advanced-level ESL students to the theory and the practice of small group discussion. Students are required to discuss social issues and engage in organizational problem solving, decision-making, and leadership. Emphasis is placed on the basic understanding of the theory behind purposeful discussion to provide students with practical experiences participating in or leading small groups. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

ENG422 Interpersonal Communication

Lecture Hours: 60; Lab Hours: 120

Total Clock Hours: 180; Quarter Credit Hours: 12

Prerequisites: Must meet program admissions requirements

This course focuses on more advanced communication skills valuable for interpersonal and academic success, such as interpersonal, intercultural and group discussion skills, classroom interactions, presentations, job interviewing, etc. Students will practice core skills needed to establish and maintain healthy interpersonal relationships. Other topics that are covered include pronunciation/accent reduction, syllable and word stress, pace, sentence intonation, common grammatical errors, and the rhythm of American English. Course activities include lecture assignments, projects, exercises, quizzes, a midterm exam, and a final exam.

General Programs

CULTURAL IMMERSION COURSE (CIC)*

The Cultural Immersion Course is based on the concept of total immersion and integration of the student into an American educational system environment for the entirety of the student's stay. This program is intended for students at various levels of English proficiency. The assumption is that the students taking this program are at least literate and have an English vocabulary of about 300 words. The goal of this program is to help students gain confidence in English, introduce scholarly tools and resources available at Computer Systems Institute, and ease their transition to studying in the U.S. During field trips to the bank, library, cafes, museums, etc., CIC students will be able to revisit the English language concepts practiced over the course of the program and be able to summarize and present their experiences both orally and in written form. The proposed program develops abilities in speaking, listening, reading, academic writing, pronunciation and grammar, as well as a social and academic orientation to life and study in the United States.
